- Company Description

Work with Us. Change the World.

At AECOM, we're delivering a better world. Whether improving your commute, keeping the lights on, providing access to clean water, or transforming skylines, our work helps people and communities thrive. We are the world's trusted infrastructure consulting firm, partnering with clients to solve the world's most complex challenges and build legacies for future generations.

There has never been a better time to be at AECOM. With accelerating infrastructure investment worldwide, our services are in great demand. We invite you to bring your bold ideas and big dreams and become part of a global team of nearly 50,000 planners, designers, engineers, scientists, digital innovators, program and construction managers and other professionals delivering projects that create a positive and tangible impact around the world.

We're one global team driven by our common purpose to deliver a better world. Join us.

Job Description

AECOM Technical Services, Inc. is seeking an Application Developer in Dallas, TX.

Job Details:

- Design, develop, and deploy custom applications within the Microsoft Power Platform to meet specific client and business requirements.

- Build high-quality Canvas Power Apps and Model-Driven Power Apps to meet requirements of clients and business.
- Build automated workflows in Power Automate and implement scalable data solutions.
- Develop Power BI dashboards to support data-driven decision-making, evaluate Microsoft Fabric capabilities for enterprise data integration, and implement Azure AI solutions within Azure AI Foundry to enable intelligent automation.
- Configure and maintain GitHub integration with the Power Platform, establish CI/CD pipelines, and improve release management through automated deployment pipelines.
- Troubleshoot and resolve issues affecting established Power Platform solutions as challenges arise during operation.
- Deploy tailored Power Platform solutions across multiple concurrent client projects using automated deployment pipelines to ensure consistent delivery.
- Incorporate stakeholder and user feedback into the ongoing development process to refine Power Platform solutions.
- Test deliverables against documented business requirements and acceptance criteria before release.
- Identify business problems and design solutions using the Power Platform and low-code and no-code development approaches.
- Lead the collection and evaluation of business and technical requirements, collaborating with project teams, users, and stakeholders to develop solutions, provide technical estimates for pipeline work, and confirm that deliverables satisfy defined acceptance criteria.
- Support the team and organization in expanding Power Platform capability through knowledge sharing, mentoring, and internal enablement activities.
- Maintain current knowledge of evolving Power Platform offerings and apply that knowledge across a variety of problems, clients, and technologies.
- Telecommuting permitted from anywhere within the US.

Qualifications

Candidates must have a Bachelor's degree in Information Technology, Software Engineering, or a related field of study and 2 years of experience as a Software Engineer, Software Developer, or in a related occupation.

Position requires experience in the following:

- Power Apps, including Canvas and Model-Driven
- Microsoft Dataverse
- Rest API
- Power Automate
- Microsoft Power BI, including DAX and Power Query
- Microsoft Fabric
- Azure AI Foundry
- GitHub
- JavaScript

Additional Information

All your information will be kept confidential according to EEO guidelines.

At AECOM, we are committed to maintaining a secure and trustworthy recruitment process and take any fraudulent hiring activity seriously. To support this commitment, all newly hired employees are required to attend an in-person Day 1 onboarding at an AECOM office location as a condition of employment.
