Work with Us. Change the World.

At AECOM, we're delivering a better world. Whether improving your commute, keeping the lights on, providing access to clean water, or transforming skylines, our work helps people and communities thrive. We are the world's trusted infrastructure consulting firm, partnering with clients to solve the world's most complex challenges and build legacies for future generations.

There has never been a better time to be at AECOM. With accelerating infrastructure investment worldwide, our services are in great demand. We invite you to bring your bold ideas and big dreams and become part of a global team of over 50,000 planners, designers, engineers, scientists, digital innovators, program and construction managers and other professionals delivering projects that create a positive and tangible impact around the world.

We're one global team driven by our common purpose to deliver a better world. Join us.

Job Description

AECOM is seeking a Geospatial Analyst to join our U.S. West Planning + Urbanism team. This role will support the Planning + Urbanism team in developing, analyzing, and managing spatial data and translating it into project deliverables that clearly visualize the analysis and key findings in maps, charts, tables, and infographics as well as writing. Applicants are expected to have experience with long-range planning and be able to interpret zoning or development regulations. No two projects our team

works on are alike so creativity and critical thinking skills are a must. This position will be located in hybrid capacity out of our Chicago or Dallas office

Job Description

The Geospatial Analyst will apply GIS technologies and spatial analysis techniques to support planning, design, environmental, infrastructure, and operational projects. The successful candidate will work collaboratively with project managers, planners, designers and technical specialists to transform complex geospatial information into actionable insights.

Responsibilities include but are not limited to:

- Perform geospatial analysis, data development, mapping, and visualization in support of multidisciplinary projects.
- Create, maintain, and manage vector, raster, imagery, and tabular geospatial datasets.
- Develop high-quality maps, figures, dashboards, and other geospatial products for technical reports, presentations, and client deliverables.
- Conduct spatial queries, geoprocessing, suitability analysis, proximity analysis, network analysis, and other advanced GIS workflows.
- Support collection, quality assurance, validation, and documentation of spatial data.
- Integrate data from multiple internal and external sources, including GPS/GNSS, CAD, remote sensing, imagery, and enterprise databases.
- Use ArcGIS Pro, ArcGIS Online, and related Esri applications to develop and maintain geospatial solutions.
- Assist with web GIS applications, dashboards, story maps, field data collection solutions, and enterprise GIS environments.
- Automate repeatable GIS processes using Python, ModelBuilder, SQL, or related tools where appropriate.
- Maintain metadata, data standards, naming conventions, and quality-control procedures.
- Coordinate with technical teams to understand project requirements and recommend appropriate geospatial methodologies.
- Support preparation of client deliverables, technical documentation, and project presentations.
- Contribute to continuous improvement of geospatial workflows, tools, and best practices.
- Work effectively across multiple projects while managing priorities, schedules, and quality expectations.

To be fully proficient in this role, the candidate must have demonstrated these experiences and skills:

- Demonstrated experience using GIS and geospatial analysis tools.
- Proficiency with ArcGIS Pro and the Esri platform.
- Experience working with vector and raster geospatial datasets.
- Strong understanding of coordinate systems, projections, spatial data structures, and geospatial data management.
- Ability to produce accurate, clear, and professional cartographic products.
- Strong analytical, organizational, and problem-solving skills.
- Ability to communicate effectively and collaborate within multidisciplinary project teams.

Qualifications

Minimum Requirements:

- Bachelor's degree in Geography, Geographic Information Systems, Geospatial Science, Environmental Science, Urban Planning, Engineering, Computer Science, or a related discipline and four years experience or demonstrated equivalency of experience and/or education

Preferred Qualifications

- Master’s degree in Urban Planning, Geographic Information Systems or a related discipline.
- Experience with ArcGIS Online, ArcGIS Enterprise, Field Maps, Survey123, Experience Builder, or Dashboards.
- Experience with Python, ArcPy, SQL, FME, ModelBuilder, or other GIS automation tools.
- Familiarity with QGIS, PostGIS, AutoCAD, Civil 3D, or other engineering and geospatial software.
- Experience with remote sensing, aerial imagery, satellite imagery, LiDAR, or terrain analysis.
- Knowledge of spatial databases and enterprise GIS environments.
- Experience supporting infrastructure, transportation, environmental, utilities, water, energy, or government projects.
- Familiarity with data governance, metadata standards, and GIS quality assurance/quality control practices.
- Esri technical certification, GISP certification, or related professional credentials are a plus

Additional Information

- This position will not offer sponsorship now or in the future.

At AECOM, we are committed to maintaining a secure and trustworthy recruitment process and take any fraudulent hiring activity seriously. To support this commitment, all newly hired employees are required to attend an in-person Day 1 onboarding at an AECOM office location as a condition of employment.

About AECOM

AECOM is proud to offer comprehensive benefits to meet the diverse needs of our employees. Depending on your employment status, AECOM benefits may include medical, dental, vision, life, AD&D, disability benefits, paid time off, leaves of absences, voluntary benefits, perks, flexible work options, well-being resources, employee assistance program, business travel insurance, service recognition awards, retirement savings plan, and employee stock purchase plan.

AECOM is the global infrastructure leader, committed to delivering a better world. As a trusted professional services firm powered by deep technical abilities, we solve our clients' complex challenges in water, environment, energy, transportation and buildings. Our teams partner with public- and private-sector clients to create innovative, sustainable and resilient solutions throughout the project lifecycle – from advisory, planning, design and engineering to program and construction management. AECOM is a Fortune 500 firm that had revenue of $16.1 billion in fiscal year 2025. Learn more at aecom.com.

What makes AECOM a great place to work

You will be part of a global team that champions your growth and career ambitions. Work on groundbreaking projects - both in your local community and on a global scale - that are transforming our industry and shaping the future. With cutting-edge technology and a network of experts, you'll have the resources to make a real impact. Our award-winning training and development programs are designed to expand your technical expertise and leadership skills, helping you build the career you've always envisioned. Here, you'll find a welcoming workplace built on respect, collaboration and community—where you have the freedom to grow in a world of opportunity.

As an Equal Opportunity Employer, we believe in your potential and are here to help you achieve it. All your information will be kept confidential according to EEO guidelines.
