We're one global team driven by our common purpose to deliver a better world. Join us.

Job Description

AECOM is seeking a creative and highly talented Mechanical Engineer for immediate employment in our Dallas or Houston, TX office.

The responsibilities of this position include, but are not limited to:

- Leading or assisting with the design of heating, ventilation and air conditioning systems as well as plumbing systems for DoD, and Mission Critical Facility projects.
- Perform Construction Administration services, including review of shop drawings, RFI’s and review of contractor proposed change orders
- Evaluate feasibility of alternative design approaches in conjunction with senior team members
- Perform site/field visits to ascertain existing conditions including equipment condition evaluations
- Organize/plan projects to ensure quality controls and project criteria are met and within budget
- Assist in preparing proposals and presenting to Clients
- Assist with mentoring of junior staff within the Mechanical Department
- Review and edit specifications
- Interact and work with a diverse set of clients and subcontractors

Qualifications

Minimum Requirements

- Bachelor’s degree in Mechanical Engineering from an ABET accredited Mechanical Engineering Program
- 4+ years of experience in mechanical design of HVAC and Plumbing systems or demonstrated equivalency of experience and/or education

Preferred Requirements

- Professional Engineer (PE) or in process of obtaining
- 6+ years of experience in mechanical design of HVAC and Plumbing systems
- Experience using AutoCAD and Revit
- Ability to interact with others on a multi-discipline team
- Ability to work on multiple projects at once
- Excellent communications skills with the ability to present designs to clients
- Good time management skills, a strong work ethic and attention to detail
- Proficient in Building Load Calculation and Energy Modeling
- Proficient in the design of HVAC, MAU/DOAS, refrigeration, piping, process piping, steam & condensate and specialty exhaust systems
- Proficient in the design of plumbing systems including sanitary, storm, water distribution, pumping and medical gas systems
- Campus distribution & central plant design experience a plus
- Energy Modeling experience a plus
- Cost estimating experience a plus
- Experience with Design-Build and other Alternate Delivery practices a plus
- Experience with Instrumentation and Controls design a plus
- Excellent Communications Skills with the ability to present designs to clients
- Additional Industry Certifications such as LEED AP, CxA or CEM

Additional Information

Sponsorship is not available for this position now or in the future.

At AECOM, we are committed to maintaining a secure and trustworthy recruitment process and take any fraudulent hiring activity seriously. To support this commitment, all newly hired employees are required to attend an in-person Day 1 onboarding at an AECOM office location as a condition of employment.
