Visa Sponsorship Available: No

Why Black & Veatch?

At Black & Veatch, you'll be part of work that matters—designing, creating, and building the infrastructure communities rely on every day, from concept through execution.

We care about how the work gets done as much as what we build. Safety is built into every decision, and people look out for each other—speaking up, collaborating, and doing the right thing because it affects real lives.

You'll work alongside teams solving complex challenges and turning ideas into solutions that perform in the real world—gaining hands-on experience across projects, technologies, and disciplines.

Ownership shows up in how we work. We take responsibility for outcomes, follow through on commitments, and take pride in what we deliver. As a 100% employee-owned company, employees share in the long-term success we build together.

With flexible ways of working and meaningful development opportunities, you'll build a career you can be proud to stand behind.

Why Black and Veatch

Black & Veatch allows you to lend your talent and perspective to humanity's biggest challenges in a flexible environment where you are empowered to grow and explore new possibilities. We offer competitive compensation; 401K match and benefits that start day one.

Our hybrid environment allows you to balance your work and personal life. At Black & Veatch, you own your career with purpose and meaning. You are empowered to grow and explore new possibilities at every step of your career journey. Bring your big ideas knowing you are safe to be who you are and speak up with concerns or questions and put your diverse talents and perspectives to use. #LI-KG1

The Opportunity

In this role, you will be engaged with exciting projects across a variety of facilities, systems and locations. From small retrofits and upgrades to large-scale Mega Projects, you will be Building a World of Difference through infrastructure growth and development while learning and focusing on your own individual development. The foundation of BV Operations provides the ability to apply your skills where needed and allows for a collaborative and innovative culture offering greater challenges and career development opportunities.

Key Responsibilities

In this role, you will have the opportunity to bring mechanical systems to life in a variety of industrial facilities. Your experience grows quickly to support the various demands of the buildings HVAC and plumbing systems. Proper selection and design ensure optimal environmental conditioning for the operation of the processing facilities systems. Using your broad focus, you will provide solutions to complex problems facing manufacturing and related customers.

The Mechanical Team is engaged in:

- Design, Preconstruction Planning, and Construction support
- Working with equipment partners to leverage the best technical solutions to the problems at hand
- Project Delivery Methods - Design-Bid-Build and Owner's Engineer, depending on need.
- Facility Types – Industrial facilities such as food and beverage manufacturing, agricultural processing, semiconductor manufacturing, pharmaceuticals, automotive manufacturing and other leading edge industries.
- Systems – HVAC, Plumbing, and Chillers

Studies:

- Energy Audit/Efficiency - Engineering studies, system performance reviews, and energy compliance calculations.
- Code Review/Application - Facility review for code compliance

Project Execution:

- Mechanical Quality Plans – concept development, defining the requirements area by area, and solutioning.
- Equipment Sizing and Selection – using utility summary, facility layouts, and OEM resources.

Preferred Qualifications

Basic knowledge of the following areas:

- General understanding of building and utility systems is preferred, interest in growing knowledge base and skillsets is required.
- Ability to perform basic HVAC Heat load calculations, energy modeling and HVAC equipment sizing
- Aware of the technical submittal review process
- Aware of bid review process
- Microsoft Office Suite
- Bluebeam Revu or other markup tool, Revit or CAD experience a plus

- International Codes Council (ICC) Suite of Codes
- ASHRAE, ASME, NFPA Handbooks / Standards

Minimum Qualifications

- Requires a bachelor's degree in engineering from either a recognized accredited program in their home country or the country in which the professional is practicing.
- Minimum of 1 year related work experience.
- All applicants must be able to complete pre-employment onboarding requirements (if selected) which may include any/all of the following: criminal/civil background check, drug screen, and motor vehicle records search, in compliance with any applicable laws and regulations.

Certifications

- Holds or in the process of obtaining Engineer-In-Training (EIT) certification.

Work Environment/Physical Demands

- This position requires working in a typical office environment. The role may entail prolonged periods of sitting and computer use, and the professional should be able to maintain focus and attention to detail throughout the workday. The position may also be require physical tasks during site visits, including crouching, grasping, and standing/walking for extended periods of time.
- Hybrid or flexible work options may be offered after the first 90 days of employment based upon manager discretion, job performance and work assignments.

Salary Plan
