Full job posting

Dallas, TX

- Job: Fire Protection Engineer
- Primary Location: Dallas, TX
- Schedule: Full-time
- Travel: Yes, 25 % of the Time
- Req ID: 263996

Description

The Assistant Fire Protection Engineer will assist in the design of multi-discipline projects and the preparation of comprehensive fire protection packages including fire suppression, fire alarm, smoke management and life-safety systems. This position will work on various projects with a diverse portfolio of project types and clients.

- Assist in the design, specification, and multi-discipline coordination of the following fire protection systems: Wet-pipe, dry-pipe, pre-action, deluge, and foam/water fire suppression systems. Fire water supply infrastructure including fire water storage tanks, fire pumps, underground and aboveground distribution piping and associated appurtenances. Outdoor fire suppression systems including monitors, spray systems, and exposure protection systems. Addressable and non-addressable voice evacuation fire alarm systems including initiation devices, supervision devices, and audible and visual notification appliances. Releasing systems for pre-action, foam/water, and clean agent systems.
- Assist in performing and evaluating fire protection calculations including the hydraulic analysis of fire water supply and demand, battery calculations, and voltage drop calculations.
- Assist in evaluating building and life safety requirements including building area and height limitations, building construction types, fire resistive assemblies and opening protections, occupancy classifications, hazards, building egress, and active and passive smoke management systems.

- Assist in the construction administration process including coordination with field personnel to resolve design related installation issues, the review of contractor shop drawings and calculations, field inspections, and testing of fire protection systems.
- Assist in performing site evaluations and documenting existing fire protection systems.
- Assist in the preparation and evaluation of project budgets and cost estimates.
- Responsible for compliance with company and site safety policies.
- Performs other duties as assigned
- Complies with all policies and standards.

Qualifications

- Bachelor Degree in Fire Protection Engineering or a related field from a recognized, accredited program required.
- ABET accreditation strongly preferred.
- Prior internship and/or related consulting experience preferred
- Minimum of a 3.0 GPA strongly preferred.
- Involvement on campus or in the community preferred.
- Basic knowledge in standard engineering techniques and procedures.
- Basic knowledge of building codes, fire codes, NFPA standards, FM Global datasheets, military standards, and refinery/industrial API guidelines a plus.
- Excellent written and verbal communication skills.
- Ability to work methodically and analytically in a quantitative problem-solving environment, and demonstrated critical thinking skills.
- Proficient computer skills (e.g. Microsoft Office Suite).
- Strong attention to detail, facilitation, team building, collaboration, organization and problem solving skills.
- Demonstrated leadership skills.
- Must have the ability to obtain and maintain access authorization to facilities and data of existing and potential clients, including, but not limited to DOE, aerospace, military, food and consumer product manufacturers, pharmaceutical, laboratories, and others necessary to perform work.
- Engineers in Training-EIT Certification preferred.
- NICET certification in Water-Based System Layout (National Institute for Certification in Engineering Technologies) preferred.
- NICET certification in Fire Alarm Systems (National Institute for Certification in Engineering Technologies) preferred.
- NICET certification in Special Hazard Systems (National Institute for Certification in Engineering Technologies) preferred.
- Candidates must be legally authorized to work permanently (i.e., without time limitations, without restrictions or without need for work sponsorship) in the country where this position is located.

This job posting will remain open a minimum of 72 hours and on an ongoing basis until filled.

EEO/Disabled/Veterans

About Burns & McDonnell

At Burns & McDonnell, you'll be empowered to build not just projects, but your career. Our expansive service offerings means stability, job security and incredible potential for growth. Move up the project management or sales cycle, or across departments and groups. Explore opportunities across our family of companies. Establish and achieve evolving goals along your career journey — all at the same company. Just choose your starting point and go.

We take on the world's toughest challenges and use our skills, experience, and courage to solve them. Working from more than 75 offices globally , our professionals transform communities through the vital infrastructure that sustains and improves quality of life.

We're proud to be a 100% employee-owned company and we invest in our most important resource — our people — with an industry-leading benefits package that supports physical, emotional and financial health. But being employee-owners means more to us than just the financial benefit. We all foster a culture of ownership, where each of us has a vested stake in the success of our company and one another. From robust training programs to a commitment to equal employment opportunities to all the ways we give back , our employee-owners help our clients, our industries and our communities thrive.
