Job description

Requisition ID: 1738976

Location: Raleigh, NC, and Dallas - 1201 Elm St

At EY, we're all in to shape your future with confidence.

We'll help you succeed in a globally connected powerhouse of diverse teams and take your career wherever you want it to go. Join EY and help to build a better working world.

EY is the only professional services firm with a separate business unit ("FSO") that is dedicated to the financial services marketplace. Our FSO teams have been at the forefront of every event that has reshaped and redefined the financial services industry. If you have a passion for rallying together to solve the most complex challenges in the financial services industry, come join our dynamic FSO team!

We help our clients transform. Together we are changing the way they interact with their Customers, Employees and Partners alike. We are modernizing their applications, creating new ones and driving business efficiency across their ever-changing platform and channel infrastructures. Everything we do centers around this simple story.

The opportunity

As an FSO Technology Service Delivery Manager, you'll be based in our Service Delivery Center, which is made up of high-performing US-based colleagues who work closely with our experienced advisory professionals. We deliver Technology project-based work and managed services to our clients. Here, you'll work as part of a project team and will be responsible for the design, build/configuration, testing, analysis, delivery and support of Technology solutions. This position is fast-paced and

ever-changing, which means you'll need to be a flexible self-starter and be able to manage changing priorities and learning new and rapidly changing technology solutions.

We are looking for Camunda Workflow Automation Engineers who will collaborate with clients to transform business operations through process orchestration, workflow automation, and digital transformation initiatives. The team leverages Camunda BPM, BPMN, DMN, Java, Spring Boot, APIs, Microservices, and Cloud technologies to modernize enterprise business processes and enable end-to-end automation.

Your Key Responsibilities

The goal is to help clients solve complex business problems through workflow automation solutions. You will analyze business requirements, model and implement BPMN workflows, automate decision processes using DMN, integrate enterprise applications, and deliver scalable, reliable, and highly automated business solutions.

Skills and attributes for success

- Deep hands-on experience with Camunda BPM, BPMN, DMN, workflow orchestration, and enterprise process automation.
- Deliver workflow automation solutions across all phases of the project lifecycle, including process discovery, design, development, integration, testing, deployment, and production support.
- Demonstrate strong technical capabilities in Camunda, Java, Spring Boot, REST APIs, Microservices, and cloud-native technologies.
- Work closely with business analysts, architects, and stakeholders to translate business processes into executable workflow solutions.
- Provide recommendations on process optimization, workflow modernization, and automation best practices.
- Willingness and ability to travel up to 30% of the time.

To qualify for the role you must have

- Bachelor's degree in Computer Science or other related field.
- A minimum of 1 years of experience in enterprise software development with exposure to Camunda BPM or workflow automation platforms.
- Experience developing workflow automation solutions using Camunda BPM, BPMN 2.0, or similar workflow technologies.
- Experience developing Java and Spring Boot services supporting business process automation.
- Experience integrating applications using REST APIs and relational databases.
- Familiarity with microservices architecture, containerization, and cloud platforms such as AWS or Azure.
- Familiarity with Git, CI/CD pipelines, and modern software development practices.
- Experience with unit and integration testing concepts.
- Comfortable working in Agile environments and collaborating with business and technical teams.

Ideally, you'll also have

- Experience with the following technologies
- Camunda 7/8, BPMN 2.0, DMN, Process Orchestration
- Java, Spring Boot, REST APIs, and Microservices
- Kafka, RabbitMQ, and event-driven architectures
- Docker, Kubernetes, OpenShift, AWS, and Azure
- Camunda Optimize, Operate, Tasklist, and workflow monitoring
- Process modernization, automation, and financial services workflow implementations

What we look for

We're interested in intellectually curious people with a passion for finding new and innovative ways to make things better. You'll also need to be a self-starter and quick learner with a strong background in computer science from both theoretical and practical points of view. If you're ready to be the future of the group and make your mark in a growing business, this role is for you.

What we offer you

At EY, we harness our collective strength to empower you to shape your future with confidence through professional growth, personal fulfillment and an inclusive culture. Learn more at ey.com/us/careers.

The salary range for this job is:

- New York City, Boston, and Washington DC Metro Areas, Washington State, and Southern California offices – $66,600 to $123,200

Bay Area California offices – $69,300 to $128,500
