Introduction

Launch your career like an IBMer

Every IBMer has a story. For many, it started with an internship.

As an IBM intern, you won't just gain experience - you'll start thinking, working, and growing like an IBMer. From day one, you'll contribute to real client projects across diverse industries, working alongside experienced IBMers who are invested in your success. You'll be challenged, supported, and inspired, often all in the same day. You'll develop technical expertise and consulting skills in a culture built on continuous learning, mentorship, and coaching. High-performing interns have a clear pathway into IBM's Associate Program, launching careers at one of the world's most innovative technology and consulting companies.

To give yourself the best opportunity for success, we advise applying only to roles that align with your skills and experience, rather than applying broadly across all entry-level positions. You'll receive a status update email for each application, so be sure to check your IBM Careers account regularly — it's the best way to get a centralized view of which roles you have active applications against.

Your role and responsibilities

During your internship, you'll gain hands-on experience by supporting client projects while developing professional and technical skills. You'll collaborate with experienced consultants, contribute to SAP-related initiatives, and build a strong foundation in enterprise technology and business transformation.

At IBM, we foster a culture of continuous learning, coaching, and mentorship. As an intern, you'll have the opportunity to grow your skills, build a strong professional network, and potentially advance into our full-time Associates Program based on your performance.

Work experiences you could be exposed to:

- SAP Business Processes: Support teams working on SAP solutions that help clients improve business functions such as finance, supply chain, procurement, and human resources.
- Business & Project Support: Assist with requirements gathering, documentation, testing, reporting, and other activities that contribute to successful SAP implementations and transformation projects.
- Stakeholder Collaboration: Work alongside functional and technical teams, participating in workshops and meetings to better understand client needs and business processes.
- Technology Exposure: Gain experience with enterprise applications and cloud technologies, including SAP platforms such as SAP S/4HANA, SAP SuccessFactors, and SAP Analytics solutions.

The primary internship program dates are May to July 2027 (10 weeks).

Required education

High School Diploma/GED

Preferred education

Bachelor's Degree

Required technical and professional expertise

- Currently pursuing a university degree with a track record of academic success (preferred majors: Computer Science, MIS/IT, Computer Engineering, Information Systems, Data Science, Business Analytics, Industrial Engineering, Accounting, Finance, Supply Chain, or related fields).
- Strong interpersonal skills that enhance collaboration and relationship building, while also managing dynamic workloads in an agile environment.
- Initiative and passion to actively seek new knowledge and improve skills while embracing a growth mindset and diverse viewpoints.
- Demonstrated leadership experience and ability to communicate effectively through active listening, with a willingness to adapt and take ownership of tasks and challenges.
- Interest in enterprise technology consulting, business transformation, ERP systems, or SAP solutions.
- Willingness to travel as needed.

Preferred technical and professional experience

- Ability to understand clients’ needs and challenges, applying a creative and logical approach to identify solutions.
- Foundational quantitative analysis skills and ability to develop data-driven recommendations.
- Exposure to ERP systems or SAP concepts is a plus.
- Exposure to one or more of the following technologies is a plus: SQL, XML, SAP Fiori, JavaScript, or reporting/analytics tools or project management tools (e.g., Agile, Jira).

ABOUT BUSINESS UNIT

- IBM Consulting is IBM’s consulting and global professional services business, with market leading capabilities in business and technology transformation. With deep expertise in many industries, we offer strategy, experience, technology, and operations services to many of the most innovative and valuable companies in the world. Our people are focused on accelerating our clients’ businesses through the power of collaboration. We believe in the power of technology responsibly used to help people, partners and the planet.

YOUR LIFE @ IBM

In a world where technology never stands still, we understand that, dedication to our clients success, innovation that matters, and trust and personal responsibility in all our relationships, lives in what we do as IBMers as we strive to be the catalyst that makes the world work better.

Being an IBMer means you’ll be able to learn and develop yourself and your career, you’ll be encouraged to be courageous and experiment everyday, all whilst having continuous trust and support in an environment where everyone can thrive whatever their personal or professional background.

Our IBMers are growth minded, always staying curious, open to feedback and learning new information and skills to constantly transform themselves and our company. They are trusted to provide on-going feedback to help other IBMers grow, as well as collaborate with colleagues keeping in mind a team focused approach to include different perspectives to drive exceptional outcomes for our customers. The courage our IBMers have to make critical decisions everyday is essential to IBM becoming the catalyst for progress, always embracing challenges with resources they have to hand, a can-do attitude and always striving for an outcome focused approach within everything that they do.

Are you ready to be an IBMer?

ABOUT IBM

IBM’s greatest invention is the IBMer. We believe that through the application of intelligence, reason and science, we can improve business, society and the human condition, bringing the power of an open hybrid cloud and AI strategy to life for our clients and partners around the world.

Restlessly reinventing since 1911, we are not only one of the largest corporate organizations in the world, we’re also one of the biggest technology and consulting employers, with many of the Fortune 500 companies relying on the IBM Cloud to run their business.

At IBM, we pride ourselves on being an early adopter of artificial intelligence, quantum computing and blockchain. Now it’s time for you to join us on our journey to being a responsible technology innovator and a force for good in the world.

IBM is proud to be an equal-opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, neurodivergence, age, or other characteristics protected by the applicable law. IBM is also committed to compliance with all fair employment practices regarding citizenship and immigration status.
