Job ID #44139

Industry Environmental

At Jacobs, we're challenging today to reinvent tomorrow by solving the world's most critical problems for thriving cities, resilient environments, mission-critical outcomes, operational advancement, scientific discovery and cutting-edge manufacturing, turning abstract ideas into realities that transform the world for good.

Your impact

The Electric Transmission Junior Siting Analyst will support electric utility clients, developers, and other infrastructure clients on transmission projects throughout planning, routing, siting, permitting, and stakeholder engagement phases.

The position will contribute to the successful development of transmission facilities, including overhead and underground lines, substations, interconnections, and related infrastructure. Responsibilities will range from supporting individual technical tasks to leading complete siting workstreams, managing project teams, and providing strategic client guidance.

The successful candidate will demonstrate sound judgment, strong organizational and communication skills, and the ability to work collaboratively across engineering, environmental, regulatory, real estate, legal, and stakeholder-engagement disciplines.

Core functions of the job may include:

- Support electric transmission siting activities, corridor/route evaluations, and substation/interconnection site screening from early feasibility through development.
- Conduct desktop research, field reconnaissance, constraint screening, and comparative route analyses using GIS, aerial imagery, technical studies, and public data.
- Coordinate with utility clients, engineers, environmental specialists, survey crews, real estate teams, regulators, municipalities, and community stakeholders.
- Assist in preparing siting study reports, routing memoranda, permitting strategies, exhibits, presentations, and project trackers.

- Maintain accurate project records, correspondence logs, decision histories, data responses, and document repositories.
- Identify risks affecting route viability, cost, schedule, permitting, property acquisition, or public acceptance, escalating complex issues appropriately.
- Assist with internal siting tools, templates, workflows, and best practices.

The Junior Siting Analyst supports day-to-day project activities under the direction of a Siting Lead or Senior Siting Lead.

Primary responsibilities:

- Perform research and compile environmental, land-use, property, regulatory, and infrastructure data.
- Support GIS mapping, constraint screening, route comparisons, and data-quality checks.
- Assist with field reconnaissance, meeting preparation, site documentation, and stakeholder tracking.
- Draft assigned portions of technical reports, exhibits, presentations, correspondence, and project trackers.
- Coordinate assigned tasks with internal teams/consultants and communicate schedule concerns or data gaps promptly

Here's what you'll need

- Bachelor's degree in planning, geography, environmental science, engineering, natural resources, real estate, public policy, or a related discipline.
- 2–4 years of experience in environmental planning, permitting, infrastructure, utilities, GIS, or land use.
- Basic ability to interpret maps and technical documents with strong research, writing, and communication skills.
- Proficiency with Microsoft Office tools and exposure to ArcGIS or other mapping platforms.
- Willingness to travel periodically for site visits and project meetings

Ideally, You'll Also Have:

- Direct experience supporting electric transmission or comparable linear infrastructure projects.
- Proven ability to manage multiple task priorities within multidisciplinary teams

Posted Salary Range: Minimum

61,700.00

Posted Salary Range: Upper

96,350.00

Our health and welfare benefits are designed to invest in you, and in the things you care about. Your health. Your well-being. Your security. Your future. Employees have access to medical, dental, vision, and basic life insurance, a 401(k) plan, and the ability to purchase company stock at a discount. Eligible employees may also enroll in a deferred compensation plan or the Executive Deferral Plan. Jacobs has an unlimited U.S. Personalized Paid Time Off (PPTO) policy for full-time salaried/exempt employees, seven paid holidays, and caregiver leave. And certain roles may be eligible for additional rewards, including merit increases, performance discretionary bonus, and stock.

The base salary range for this position is $61,700.00 to $96,350.00. Within the range, individual pay is determined by work location and additional factors, including job-related skills, experience, and relevant education or training.

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability or protected veteran status. Job posted on August 24, 2026. This position will be open for at least 3 days.

At Jacobs, we’re partnering across the globe to create the best project outcomes by maximizing the design, digital technology, and support capabilities of our Global Integrated Delivery (GID) teammates. By joining Jacobs, you’ll commit to supporting and engaging with these teams, as we work to build a company like no other.

We value collaboration and believe that in-person interactions are crucial for both our culture and client delivery. We empower employees with our hybrid working policy, allowing them to split their work week between Jacobs offices/projects and remote locations enabling them to deliver their best work.

Your application experience is important to us, and we’re keen to adapt to make every interaction even better. If you require further support or reasonable adjustments with regards to the recruitment process (for example, you require the application form in a different format), please contact the team via Careers Support .
