State TX

Country United States Area of Interest Internship Type Part Time - Temporary Job ID 2026-26995 Business Group Grid Group Department Transmission Line Engineering

Responsibilities

This position has a target start date in summer 2027.

As an Associate Engineering Intern, you will be assigned to work on a project team in our Grid business unit and assist the engineering team members in the execution of their project work. These projects may involve the design of new and/or modifications and upgrades to transmission and distribution engineering projects.

Working under the direction of senior engineers, this internship will offer you the opportunity to utilize and expand your academic background in Civil, Structural, Mechanical, Electrical, or other Engineering disciplines in one or more of the following areas:

- Assist in the preparation of engineering calculations, specifications, and designs.
- Work on a variety of tasks associated with project reporting, such as tracking and evaluating project activities, project progress, and associated data.
- Be involved in power designs and the preparation of documents and specifications for the procurement of major equipment, structures, and related installation services.

This role offers a hybrid work arrangement, with the expectation of spending three days a week in the office, giving you the flexibility to work remotely for two days.

Qualifications

We do not sponsor employees for work authorization in the U.S. for this position.

Essential skills and experience:

- Active enrollment in a Bachelor of Science or Master of Science in Civil, Structural, Mechanical, or Electrical Engineering with a strong academic background.
- Candidates pursuing other engineering degrees may also be considered if they have relevant coursework in civil, geotechnical, strength of materials, statics, or electrical power.
- Strong organizational skills with high attention to detail.
- Self-Starter, proactive, able to work independently with minimal direction.
- Ability to quickly identify and prioritize issues, create solutions, and meet deadlines.

Valued but not required skills and experience:

- Active enrollment in a BS or MS ABET Engineering Accreditation Commission-approved program.
- Demonstrated leadership experience within campus and/or the community.
- Minimum of a 3.0 GPA strongly preferred.
- Prior, related internship or co-op experience in our business area.

Technology & Innovation

Sargent & Lundy values the appropriate use of technology to improve how work gets done and deliver high-quality outcomes for our clients. Depending on the role, employees may use data, automation, artificial intelligence, and other digital tools to support research, analysis, engineering and design activities, workflow improvement, or other aspects of their work.

We value candidates who demonstrate an interest in learning and effectively using emerging technologies where relevant to their role. Employees remain accountable for their work and are expected to apply appropriate professional judgment and review when using technology-assisted tools.

Experience with AI, automation, programming, or similar technologies is valued where relevant but is not required unless specifically identified elsewhere in the job description.

About Sargent & Lundy

At Sargent & Lundy, we care about the health and well-being of our employees. Our commitment extends beyond the workplace, offering comprehensive healthcare plans and generous paid time off to support our team members in every aspect of their lives. We understand the importance of work-life balance, which is why we are proud to provide competitive, award-winning benefits. Our dedication to employee satisfaction has earned us the prestigious Top Workplaces Culture Excellence Award for compensation and benefits in 2022, 2023, and 2024.
