Electronics Design Engineer - Space Exploration Electronic Systems

Amentum · Houston, TX

Job ID (this collection)	CONSULT-084
Employer	Amentum
Location(s)	Houston, TX
Career stage	Experienced (10+ years asked)
Location group	Texas (outside DFW)
Majors	Computer Engineering, Electrical Engineering
Consulting area	Government, defense & space engineering services
Pay listed	Not listed
Rules stated	Citizenship / clearance rules
Recruiting status when checked	Open when checked: the employer page showed the posting on Oct 28, 2026.
Employer page	https://www.amentumcareers.com/jobs/electronics-design-engineer-space-exploration-electronic-systems-houston-texas-united-states-6b228c82-eb56-4905-9a50-36a91c4866e1
Captured	October 28, 2026

Saved on October 28, 2026 from Amentum's own careers page. Everything below the line is the employer's own wording, copied word for word and checked against the live page; only the layout was changed for printing. Live listings change and close, so check the employer page before applying.

- On Site
- Houston, Texas, United States
- Full time
- No Clearance

Are you passionate about human space exploration, understanding the origins of the universe, and working with a passionate and diverse team to make a difference? If you are, we need you!

We need your talent, teamwork, and energy to help us achieve great things that inspire people all over the globe. We need you to bring creative ideas and diverse backgrounds to help us envision, shape, and deliver systems that will enable the exploration of space while benefiting people here on Earth. We are excited about what we do, and we need you on our team as we take on exciting challenges for NASA's pursuits in deep space exploration. As NASA's largest engineering solutions provider working together with NASA at centers across the United States.

We have an exciting opportunity for a Electronics Design Engineer - Space Exploration Electronic Systems to join the team with Nexus, a teammate company.

The Electronics Design Engineer - Space Exploration Electronic Systems will:

- Report directly to the Electronics and Electrical Section Manager as part of group of over 45 other Electronics and Electrical Engineers.
- Work directly with or as a Team Lead and associated Electrical Engineers on a given project.
- Support new designs from conception, analysis, and manufacturing, through to operational test and deployment.
- Provide design support and guidance in various aspects of Electronics System Development.
- Be familiar with NASA specifications for Electronics Component development.
- Develop component test stand architectures for various components.

- Design and generate electrical component and lab instrumentation test system designs.
- Develop and or modify LabVIEW code for various test systems.
- Develop detailed test verification procedures.
- Work with electrical and mechanical technicians to build and test designed systems.
- Develop and test various breakout boxes and digital/analog sensor emulation systems.
- Perform electrical evaluation/selection of instrumentation (pressure transducers, flow meters, pumps, fans, RTDs, Thermocouples, etc.).
- Troubleshoot and repair existing test systems.
- Conduct analog and digital printed circuit board design for various application needs.
- Develop test software modules to perform specific tests.
- Work with eCAD designer to develop printed circuit board designs.
- Work in a laboratory environment, following standard operating procedures.
- Perform other duties as required and assigned.

Requisition Qualifications:

This position has been posted at multiple levels. Depending on the candidate's experience, requirements, and business needs, we reserve the right to consider candidates at any level for which this position has been advertised.

- Typically requires a minimum of a bachelor's degree in Engineering and may be expected to have a related master's degree and normally possess 10-15 years of related experience.
- Prior experience leading team of electronics design engineers.
- Experience in requirements definition and architecture development.
- Prior experience with circuit design of analog PCB, digital PCB, and power PCB, including fabrication and assembly.
- Prior experience with electrical schematic entry and printed circuit board layout tools such as Altium Designer, and version control software like Subversion (SVN).
- Prior experience in cable design and fabrication for space applications.
- Prior experience with JSC standards and processes.
- Prior experience with data acquisition systems (especially National Instruments) and LabVIEW code development
- Prior experience with FPGA circuitry design and coding in associated VHDL development environments (Xilinx FPGA using VIVADO tool) for space applications.
- Experience in microcontroller circuit design and development of embedded systems, including hands-on design, build, and testing, as well as proficiency with embedded software development environments.
- Prior experience with requirements verification.

Requisition Preferences:

- Prior experience programming in C/C++ and Python.
- Prior experience with circuit simulation tools such as Pspice, OrCAD, Multisim etc.
- Experience with test hardware such as oscilloscopes, multi-meters, logic analyzers, function generators, electronic load banks, power supplies, power analyzers.
- Familiarity with data interface protocols and associated hardware such as Ethernet, RS232, RS422, RS485, I2C, SPI etc.
- Prior experience in design and test of analog instrumentation systems. Prior experience with design and testing of analog instrumentation systems, stepper and brushless DC-DC control circuits, and of power supply and conditioning systems.
- Experience in the design, development, and validation of NASA space-flight hardware.
- Excellent communication skills, organizational skills and the ability to work in a multi-disciplinary team of mechanical, electrical, and software engineers designing and building world-class, NASA space-flight hardware.
- Proficient in MS Office programs, particularly MS Project, Excel, PowerPoint, Word, OneNote, OneDrive and Outlook.

Why Join Our Team?

In addition to exciting career opportunities, we also have:

- Excellent personal and professional career growth
- 9/80 work schedule (every other Friday off), when applicable
- Onsite cafeteria (breakfast & lunch)
- Much, much more!

For more information on our partnership with NASA at Johnson Space Center (JSC), please visit www.wehavespaceforyou.com

- Proof of U.S. Citizenship or US Permanent Residency may be a requirement for this position.
- Must be able to complete a U.S. government background investigation.
- Management has the prerogative to select at any level for which the position is advertised.

Essential Functions

Work Environment

Generally, an office environment, but can involve inside or outside work depending on task.

Physical Requirements

Work may involve sitting or standing for extended periods (90% of time). May require lifting and carrying up to 25 lbs. (5% of time).

Equipment and Machines

Standard office equipment (PC, telephone, printer, etc.).

Attendance

Regular attendance in accordance with established work schedule is critical. Ability to work outside normal schedule and adjust schedule to meet peak periods and surge requirements.

Other Essential Functions

Professional behavior that enhances productivity and promotes teamwork and cooperation. Grooming and dress must be appropriate for the position and must not impose a safety risk/hazard to the employee or others.

Compensation Details:

EN4-ESS

The compensation range or hourly rate listed for this position is provided as a good-faith estimate of what the company intends to offer for this role at the time this posting was issued. Actual compensation may vary based on factors such as job responsibilities, education, experience, skills, internal equity, market data, applicable collective bargaining agreements, and relevant laws.

Benefits Overview:

Our health and welfare benefits are designed to support you and your priorities. Offerings include:

- Health, dental, and vision insurance
- Paid time off and holidays
- Retirement benefits (including 401(k) matching)
- Educational reimbursement
- Parental leave
- Employee stock purchase plan
- Tax-saving options
- Disability and life insurance
- Pet insurance

Note: Benefits may vary based on employment type, location, and applicable agreements. Positions governed by a Collective Bargaining Agreement (CBA), the McNamara-O'Hara Service Contract Act (SCA), or other employment contracts may include different provisions/benefits.

Original Posting:

06/25/2026 - Until Filled

Amentum anticipates this job requisition will remain open for at least three days, with a closing date no earlier than three days after the original posting. This timeline may change based on business needs.

Amentum is proud to be an Equal Opportunity Employer. Our hiring practices provide equal opportunity for employment without regard to race, sex, sexual orientation, pregnancy (including pregnancy, childbirth, breastfeeding, or medical conditions related to pregnancy, childbirth, or breastfeeding), age, ancestry, United States military or veteran status, color, religion, creed, marital

or domestic partner status, medical condition, genetic information, national origin, citizenship status, low-income status, or mental or physical disability so long as the essential functions of the job can be performed with or without reasonable accommodation, or any other protected category under federal, state, or local law. Learn more about your rights under Federal laws and supplemental language at Labor Laws Posters.
