Company: Black & Veatch Family of Companies

Together, we own our company, our future, and our shared success.

As an employee-owned company, our people are Black & Veatch. We put them at the center of everything we do and empower them to grow, explore new possibilities and use their diverse talents and perspectives to solve humanity's biggest challenges in an ever-evolving world. With over 100 years of innovation in sustainable infrastructure and our expertise in engineering, procurement, consulting and construction, together we are building a world of difference.

Company : Black & Veatch Corporation

Req Id : 116994

Opportunity Type : College full time

Relocation eligible : Yes

Full time/Part time : Full-Time

Project Only Hire : No

Visa Sponsorship Available: No

Why Black & Veatch?

At Black & Veatch, you'll be part of work that matters—designing, creating, and building the infrastructure communities rely on every day, from concept through execution.

We care about how the work gets done as much as what we build. Safety is built into every decision, and people look out for each other—speaking up, collaborating, and doing the right thing because it affects real lives.

You'll work alongside teams solving complex challenges and turning ideas into solutions that perform in the real world—gaining hands-on experience across projects, technologies, and disciplines.

Ownership shows up in how we work. We take responsibility for outcomes, follow through on commitments, and take pride in what we deliver. As a 100% employee-owned company, employees share in the long-term success we build together.

With flexible ways of working and meaningful development opportunities, you'll build a career you can be proud to stand behind.

The Opportunity

We are seeking a Consulting Analyst in Black & Veatch's Infrastructure Advisory Business to support our rapidly growing business. As an Analyst, you will have the opportunity to:

- Contribute to delivering projects for a wide range of clients, including water, electric, and gas utilities, oil and gas clients, data centers and other commercial clients.
- Develop core consulting skills through a range of training, structured mentoring, and project exposure.
- Gain experience in a wide range of areas, including strategy and planning, digital and AI/ML, asset management, system implementations (including Operational Technology, Enterprise Asset Management, Advanced Metering Infrastructure), and asset engineering.

Key Responsibilities

Under close supervision, perform routine foundational aspects of business, technical, technology or digital consulting requiring knowledge and application of basic principles. Apply knowledge of basic consulting attributes and technical expertise to complete project assignments.

- Collect, analyze and interpret quantitative and qualitative data to provide insights, identify trends, opportunities and risks.
- Under close supervision, prepare reports, presentations, processes, tools, models, and other client- ready deliverables, demonstrating attention to detail, clarity, and logical structure.
- Participate in client meetings and workshops to support the project team with presentation, facilitation, and note taking.
- Recognize and apply appropriate technical methods to diagnose issues and develop solutions, and engage technical subject matter experts to fill knowledge gaps.
- Begin developing professional judgment through exposure to industry practices and guidance from senior team members.
- Understand and adhere to budget, schedule, and quality requirements. Demonstrate accountability for delivering assigned work on time and to expected quality standards.
- Collaborate with team members and subject matter experts to ensure high-quality deliverables and successful project outcomes. Escalate risks, issues, or questions in a timely manner.
- Stay current with industry trends, emerging technologies and best practices. Develop knowledge and experience in specific specializations and industries (minors) and participate in professional development opportunities. Share current knowledge of latest technology and processes.
- Develop foundational knowledge across IA solution areas and industries, with expectations to build depth in a specialization over time. Demonstrate learning agility and curiosity in acquiring new skills and tools.

Preferred Qualifications

- Internship or other work experience on an engineering project or in an engineering or consulting environment preferred.

Preferred Skills:

- Ability to develop functional or technical knowledge in at least one target industry
- Ability to develop functional or technical knowledge in at least one solution area
- Decision making abilities such as provide insight on issues of more than one dimension
- Human relations skills including collaboration and team functions
- Knowledge of Microsoft Office Suite and other generally accepted software for the business
- PC literacy with applied knowledge

Preferred Consultant Skills:

- Demonstrates curiosity and initiative in learning new tools, technologies, and industry concepts
- Ability to break down problems into logical components with guidance
- Produces high-quality work products with strong attention to detail
- Communicates clearly in written and verbal formats
- Works effectively in team-based, deadline-driven environments

Minimum Qualifications

Bachelor of Arts or Science, preferably in business, math, or engineering OR relevant business experience. 0-2 years experience in business/consulting environment. All applicants must be able to complete pre-employment onboarding requirements (if selected) which may include any/all of the following: criminal/civil background check, drug screen, and motor vehicle records search, in compliance with any applicable laws and regulations.

Work Environment

Hybrid or flexible work options may be offered after the first 90 days of employment based upon manager discretion, job performance and work assignments.

Competencies

- Action oriented
- Customer focus
- Interpersonal savvy
