Full job posting

- Austin, Texas
- Geospatial / Survey
- Regular Full-Time
- S1
- 13993
- Short Description

Bowman has an opportunity for a LiDAR Technician I to join our team in Austin, TX.

At Bowman, we believe in creating opportunities for aspiring people to thrive and achieve ambitious goals. That's why a career at Bowman is more than a job. It is an opportunity to be part of a diverse and engaged community of professionals, to be treated as a respected and valued member of a motivated team and to be empowered to do exceptional work that advances the best interest of everyone involved. We recognize the importance of creating a work environment that is both rewarding to our employees and supportive of our unwavering commitment to provide unparalleled service to our clients.

Purpose

Supports LiDAR data processing and production workflows under direct supervision. Performs foundational geospatial tasks while developing proficiency in LiDAR processing software, data management, and QA/QC procedures.

Responsibilities

Leadership and Direction

- Receives guidance and direction from senior technicians and project leads.
- Participates in training and professional development activities.
- Demonstrates willingness to learn new workflows and technologies.

At the Operational and Company Level

- Supports project teams in meeting production schedules and deliverable requirements.
- Maintains organized project files and processing documentation.
- Follows established company standards and procedures.

Do the Work

- Process LiDAR datasets using MicroStation, TerraScan, TerraModeler, or similar software.
- Assist with point cloud classification and feature extraction.
- Perform routine QA/QC checks following established procedures.
- Utilize Global Mapper, Google Earth, and related geospatial tools for data review and validation.
- Assist with coordinate system management and geospatial data organization.
- Support preparation of mapping and engineering deliverables.
- Maintain processing logs and documentation.

Success Metrics and Competencies

- Ability to work both independently and within a team environment.
- Highly motivated and problem-solving attitude.
- Strong sense of urgency in responding to constituents.
- Effective verbal and written communication skills.
- Strong work ethic and commitment to quality.
- Self-reliance and ability to operate independently with limited direction.
- Effective working relationship with internal leaders and peers, as well as external clients.
- Ability to effectively manage multiple time-sensitive tasks.
- Data analysis and interpretation skills.
- Consistent delivery of high-quality LiDAR datasets meeting client specifications and timelines.
- Effective team leadership demonstrated through productivity, engagement, and skill development.
- Strong technical proficiency in LiDAR processing, QA/QC, and geospatial data management.
- Ability to manage multiple priorities and deliver in a fast-paced production environment.
- Clear and effective communication with internal teams and external clients.
- Continuous improvement through adoption of new tools, technologies, and automation strategies.
- Strong organizational skills and attention to detail in documentation and workflow management.

Qualifications

- High School diploma or GED required.
- Associate's degree, technical certification, or coursework in GIS, Surveying, Geomatics, or related field preferred.
- Entry level position. Zero to two (0-2) years of LiDAR, GIS, survey, or geospatial experience a plus.
- Basic understanding of LiDAR and geospatial concepts preferred.
- Familiarity with Microsoft Office applications.
- Strong attention to detail and willingness to learn.

About Bowman

Are you ready to build a career that makes a lasting impact? At Bowman, our people are at the center of everything we do. We’re committed to creating an environment where employees can thrive both personally and professionally, while helping to shape the infrastructure of tomorrow.

A career at Bowman means being part of a collaborative, forward-thinking organization where innovation, inclusion, and growth are encouraged at every level. We offer competitive compensation, a supportive work environment, and benefits designed to help our employees succeed.

Our comprehensive benefits package includes:

- Medical, dental, vision, life, and disability insurance
- 401(k) retirement savings plan with company match
- Paid time off, sick leave, and paid holidays
- Tuition reimbursement and professional development support
- Discretionary bonuses and other performance-based incentives
- Employee Assistance Program (EAP), wellness initiatives, and employee discounts

Eligibility for certain benefits may vary based on position, location, and employment status.

Physical Demands and Working Environment

- Primarily indoor professional office environment which may include bright/dim light, noise, fumes, odors, and traffic.
- Mobility around an office environment.
- Frequent and prolonged use of standard office equipment such as computers, phones, photocopiers, filing cabinets and fax machines.
- Partially outdoor work environment which may include adverse weather conditions, varying temperatures, excessive noise, and/or potential hazards.
- Mobility around a job/construction site to include walking, bending, crawling, climbing, squatting, or kneeling and wearing of required Personal Protective Equipment (PPE).
- Primarily local travel during the business day, although some out-of-the-area and overnight travel may be required according to the needs of the business.
- Occasional lifting or carrying up to 20 pounds.
- Occasional pushing or pulling up to 20 pounds.
- Occasional reaching outward or above shoulder.
