Full job posting

- Austin, Texas
- CAD/Design/BIM (Production)
- Regular Full-Time
- S1
- 14021
- Short Description

Bowman has an opportunity for a Survey CAD Technician I to join our team in Austin, TX.

At Bowman, we believe in creating opportunities for aspiring people to thrive and achieve ambitious goals. That's why a career at Bowman is more than a job. It is an opportunity to be part of a diverse and engaged community of professionals, to be treated as a respected and valued member of a motivated team and to be empowered to do exceptional work that advances the best interest of everyone involved. We recognize the importance of creating a work environment that is both rewarding to our employees and supportive of our unwavering commitment to provide unparalleled service to our clients.

Purpose

Assist in the preparation of project deliverables and contract documents in accordance with the company design standards and client requirements.

Responsibilities

Leadership and Direction

Perform work under direct supervision of an experienced professional and follow established procedures and clearly defined processes. Receive direction on all aspects of assignments, specific tasks and how to execute. Work is thoroughly reviewed by more senior staff to ensure application of sound techniques and principles.

At the Operational and Company Level

Work closely with more senior staff members to learn and assist in survey and mapping work.

Do the Work

- Under supervision, convert all applicable information into electronically generated drawings and project documents with accuracy, neatness, and speed.
- Perform horizontal computations for boundary surveys and analyses of field location and record information to determine property lines.
- Draft final house location surveys from survey crew field notes and personal field measurements of building improvements.
- Compute horizontal positions of plan buildings, streets, curbs for stakeouts.
- Check record plats for completeness and accuracy prior to submitting for review.
- Submit plots to county for review.
- Gain a thorough knowledge of ALTA Land Title Surveys, topographic surveys, boundary surveys, residential and commercial construction stakeout procedures, and practices.
- Perform a variety of complex computations for traverse, record plats, boundary surveys, construction stakeouts, horizontal control, etc.

Success Metrics and Competencies

- Ability to work both independently and within a team environment.
- Highly motivated and problem-solving attitude.
- Strong sense of urgency in responding to constituents.
- Effective verbal and written communication skills.
- Strong work ethic and commitment to quality.
- Self-reliance and ability to operate independently with limited direction.
- Effective working relationship with internal leaders and peers, as well as external clients.
- Ability to effectively manage multiple time-sensitive tasks.
- Data analysis and interpretation skills.

Qualifications

- High school diploma or GED required, associate's degree in survey, geography, architecture or civil engineering preferred. Commensurate relevant experience considered.
- Entry level position, no prior experience required. Any surveying and/or CAD experience in the land development/land survey industry a plus.
- Knowledge of commonly used concepts, practices, and procedures.
- Knowledge of ALTA surveys, topographic surveys, construction layout, boundary surveys, and subdivision work.
- Demonstrated familiarity with land surveying and/or surface modeling software such as Carlson, Bentley Inroads/Geopak, Revit, or similar civil engineering design software.

About Bowman

Are you ready to build a career that makes a lasting impact? At Bowman, our people are at the center of everything we do. We’re committed to creating an environment where employees can thrive both personally and professionally, while helping to shape the infrastructure of tomorrow.

A career at Bowman means being part of a collaborative, forward-thinking organization where innovation, inclusion, and growth are encouraged at every level. We offer competitive compensation, a supportive work environment, and benefits designed to help our employees succeed.

Our comprehensive benefits package includes:

- Medical, dental, vision, life, and disability insurance
- 401(k) retirement savings plan with company match
- Paid time off, sick leave, and paid holidays
- Tuition reimbursement and professional development support
- Discretionary bonuses and other performance-based incentives
- Employee Assistance Program (EAP), wellness initiatives, and employee discounts

Eligibility for certain benefits may vary based on position, location, and employment status.

Physical Demands and Working Environment

- Partly indoor professional office environment which may include bright/dim light, noise, fumes, odors, and traffic.
- Mobility around an office environment.

- Frequent and prolonged use of standard office equipment such as computers, phones, photocopiers, filing cabinets and fax machines.
- Partly outdoor work environment which may include adverse weather conditions, varying temperatures, excessive noise, and/or potential hazards.
- Mobility around a job/construction site to include walking, bending, crawling, climbing, squatting, or kneeling and wearing of required Personal Protective Equipment (PPE).
- Frequent and prolonged use of data collection equipment and/or drones, necessitating walking the assigned study area to complete data collection over the course of several hours.
- Primarily local travel during the business day, although some out-of-the-area and overnight travel may be required according to the needs of the business.
- Occasional lifting or carrying up to 20 pounds.
- Occasional pushing or pulling up to 20 pounds.
- Occasional reaching outward or above shoulder.
