Position Overview

Cognizant is seeking a highly skills and innovative Business & Data Analyst to join our Intuitive Operations and Automation (IOA) practice. We are a leading AI-powered BPO and Intelligent Automation Practice combining deep industry expertise, process innovation, advanced AI and human ingenuity to help clients—from large digital disruptors to leading global enterprises—drive efficiency, grow existing and new revenue streams and power the next generation of operations. We're shifting the industry from cost takeout to driving revenue growth, and from traditional outsourcing to AI-powered reinvention of the enterprise. We drive outcomes through autonomous, adaptive operations that are powered by agentic AI and built for business impact.

What you'll learn

Hands-on training in AI-powered business analysis and consulting methodology.

Exposure to enterprise clients and real-world business problems from day one.

Mentorship from senior consultants as you build client-facing and technical skills.

Responsibilities

Analyze business processes, requirements, and operational data to identify improvement opportunities and support strategic decision-making.

Use AI tools like Microsoft Copilot, Claude, Gemini, ChatGPT, and Codex daily to speed up research, analysis, and documentation.

Perform data analysis using Excel, Power BI, SQL, and other analytics tools to generate actionable business insights.

Build and refine prompts to improve the quality and consistency of AI-assisted work.

Support the design and adoption of Agentic AI solutions by identifying use cases, documenting requirements, and validating business outcomes.

Prepare executive-ready presentations, reports, process maps, and business recommendations for clients and stakeholders.

Bring strong analytical thinking, curiosity, and a willingness to learn new AI tools and business trends.

Qualifications

Bachelor’s degree in Business Analytics, Computer Science, Information Systems, Data Science, Finance, or related field (recent grads welcome)

Familiarity with Excel required; exposure to Power BI or SQL is a plus

Nice-to-have: Exposure to Python, Copilot Studio, or automation tools.

Hands-on experience using AI tools (ChatGPT, Copilot, Claude, Gemini, etc.) for schoolwork or projects.

Ability to grasp business needs and assess impacts to complex business operations and systems

- Ability to work creatively and analytically in a problem-solving environment
- Excellent written and verbal communication
- Proven capabilities in teamwork and leadership
- Strong interest in technology and digital modernization
- Self-motivated

Location

New hires will be hired to Cognizant offices and/or client locations in Chicago, IL or Teaneck, NJ where you will work alongside other experienced Cognizant associates delivering technology solutions. Applicants must be willing to relocate to one of these major geographic areas. While we attempt to honor candidate location preferences, business need and position availability will determine final location assignment.

Start Date

New hires will start in October/November 2026 or January/February 2027. Exact start dates will be communicated with enough time for you to plan effectively.

Salary and Other Compensation:

The annual salary for this position is $80,000 depending on experience and other qualifications of the successful candidate. This position is also eligible for Cognizant’s discretionary annual incentive program, based on performance and subject to the terms of Cognizant’s applicable plans.

Why Choose Us?

Cognizant delivers solutions that draw upon the full power and scale of our associates. You will be supported by high-caliber experts and employ some of the most advanced and patented capabilities. Our associate’s diverse backgrounds offer multifaceted perspectives and fuel new ways of thinking. We encourage lively discussions which inspire better results for our clients.

Benefits

Cognizant offers the following benefits for this position, subject to applicable eligibility requirements:

- Medical/Dental/Vision/Life Insurance
- Paid holidays plus Paid Time Off
- 401(k) plan and contributions
- Long-term/Short-term Disability
- Paid Parental Leave
- Employee Stock Purchase Plan

Disclaimer

The hourly rate, other compensation, and benefits information is accurate as of the date of this posting. Cognizant reserves the right to modify this information at any time, subject to applicable law.

Work Authorization

Due to the nature of this position, Cognizant cannot provide sponsorship for U.S. work authorization (including participation in a CPT/OPT program) for this role.

Additional employment information

Compensation information is accurate as of the date of this posting. Cognizant reserves the right to modify this information at any time, subject to applicable law.

Applicants may be required to attend interviews in person or by video conference. In addition, candidates may be required to present their current state or government issued ID during each interview.

Cognizant is an equal opportunity employer. Your application and candidacy will not be considered based on race, color, sex, religion, creed, sexual orientation, gender identity, national origin, disability, genetic information, pregnancy, veteran status or any other characteristic protected by federal, state or local laws.

Applicants for US based positions must be currently authorized to work for any employer in the United States. The company is unable to provide employment-based immigration sponsorship for US based positions.

If you have a disability that requires reasonable accommodation to search for a job opening or submit an application, please email CareersNA2@cognizant.com for roles based in the Americas or CareersIndia2@cognizant.com for roles based in India.

About Cognizant:

Cognizant (Nasdaq: CTSH) is an AI Builder and technology services provider, bridging the gap between AI investment and enterprise value by building full-stack AI solutions for our clients. Our deep industry, process and engineering expertise enables us to build an organization’s unique context into technology systems that amplify human potential, drive tangible outcomes and keep global enterprises ahead in a fast-changing world.
