Full job posting

Location: Houston, US-TX, United States

Department: Construction

Business unit: Fluor Headquarters

Job ID: 7966

Posted: 2026-08-14

At Fluor, we are proud to design and build projects and careers. We are committed to fostering a welcoming and collaborative work environment that encourages big-picture thinking, brings out the best in our employees, and helps us develop innovative solutions that contribute to building a better world together. If this sounds like a culture you would like to work in, you're invited to apply for this role.

Job Description

Fluor is seeking a Construction Automation Specialist I to support model-based project execution through the coordination, validation, analysis, visualization, and automation of construction information. This role will work closely with Engineering, Construction, BIM, Project Controls, and Digital Delivery teams to improve project planning, execution, and reporting through the effective use of digital construction technologies. The ideal candidate will possess strong analytical skills, experience working with 3D models and construction data, and a passion for leveraging technology to enhance project delivery.

Key Responsibilities

- Coordinate, manage, and maintain multidisciplinary federated 3D models throughout the project lifecycle.
- Aggregate and manage models from engineering disciplines and project stakeholders using Navisworks and related platforms.
- Perform model QA/QC, data validation, constructability reviews, and data integrity assessments.
- Develop 4D simulations and construction sequencing visualizations to support planning and execution strategies.
- Support construction teams with model-based planning, work packaging, execution readiness reviews, and construction analytics.
- Utilize model metadata and object properties to support reporting, material management, project controls, and completions processes.

- Develop dashboards, reports, visualizations, and data extracts that support project execution and business decision-making.
- Assist in the development and implementation of automated workflows for model validation, quality assurance, reporting, and data management.
- Facilitate integration and communication between BIM, Engineering, Construction, Project Controls, Work Packaging, and Digital Delivery teams.
- Evaluate and support digital construction technologies and automation solutions that improve project execution.
- Analyze project challenges and recommend innovative automation and digital construction solutions.
- Maintain awareness of emerging industry trends and technologies related to BIM, digital construction, automation, and model-based execution.

Basic Job Requirements

Basic Qualifications

- Bachelor's degree in Engineering, Construction Management, BIM, Information Technology, Computer Science, or related field; or equivalent combination of education and directly related experience.
- Strong verbal and written communication skills.
- Fundamental understanding of construction execution processes and digital construction technologies.
- Ability to learn and apply Fluor standards, procedures, and automation workflows.
- Experience working with large datasets and model-based information.
- Strong attention to detail and ability to work effectively in a fast-paced project environment.

Other Job Requirements

Preferred Qualifications

Preferred Qualifications

- Experience supporting industrial, manufacturing, energy, oil & gas, life sciences, semiconductor, mining, chemical, or other large capital projects.
- Experience working with and validating large federated 3D models.
- Proficiency with Navisworks for model coordination, validation, navigation, and data analysis.
- Experience developing 4D construction simulations using Navisworks Timeliner, SYNCHRO, or similar platforms.
- Familiarity with BIM data structures, metadata, and model-based reporting.
- Experience with iConstruct, including BIMFlow, Data Links, data validation, reporting, and workflow automation.
- Knowledge of Advanced Work Packaging (AWP), workface planning, construction planning, and execution readiness processes.
- Experience with Hexagon Smart 3D, Octave Forte, SmartPlant Review (SPR), and SmartPlant Interop Publisher (SPIOP).
- Familiarity with Autodesk Construction Cloud (ACC), BIM 360, Common Data Environments (CDE), and ISO 19650 standards.
- Experience developing automated workflows, reporting tools, and digital construction solutions.
- Strong analytical, organizational, and problem-solving capabilities.
- Advanced proficiency with spreadsheet, presentation, database, and reporting software.

This position is based in Fluor's Houston, Texas office and offers the opportunity to support some of the world's most complex engineering and construction projects through innovative digital construction and automation solutions.

We are an equal opportunity employer. All qualified individuals will receive consideration for employment without regard to race, color, age, sex, sexual orientation, gender identity, religion, national origin, disability, veteran status, genetic information, or any other criteria protected by governing law.

Benefits Statement: Fluor is proud to offer a comprehensive benefits package designed to promote employee health, wellness, and financial security. Our offerings include medical, dental and vision plans, EAP, disability coverage, life insurance, AD&D, voluntary benefit plans, 401(k) with a company match, paid time off (personal, bereavement, sick, holidays) for salaried employees, paid sick leave per state requirement for craft employees, parental leave, and training and development courses.

Market Rate Statement: The market rate for the role is typically at the mid-point of the salary range; however, variations in final salary are determined by additional factors such as the candidate’s qualifications, relevant years of experience, geographic location, internal pay equity, and prevailing market conditions for the specific role.

Notice to Candidates: Background checks are carried out as part of any conditional offer made, including (but not limited to & role dependent) education, professional registration, employment, references, passport verifications and Global Watchlist

screening.

To be Considered Candidates: Must be authorized to work in the country where the position is located.

Salary Range: $53,500.00 - $99,500.00
