Industry Cities & Places

At Jacobs, we're challenging today to reinvent tomorrow by solving the world's most critical problems for thriving cities, resilient environments, mission-critical outcomes, operational advancement, scientific discovery and cutting-edge manufacturing, turning abstract ideas into realities that transform the world for good.

Your impact

We are searching for an Entry-Level Electrical Engineer to join our Buildings team in Ausitn or San Antonio, TX. As part of our team, you'll have the opportunity to work on projects that deliver innovative solutions to our clients' challenges, both locally and globally.

In this role, you will work alongside experienced Professional Engineers while engaging with clients, evaluating project needs, and developing engineering solutions

Your responsibilities will include preparing electrical engineering designs and construction documents, including single-line diagrams, installation details, electrical room layouts, connection diagrams, cable schedules, control panel layouts, grounding systems, lighting designs, and power plans. You will also support the development of breaker coordination studies and Arc Flash/Short-Circuit Current studies. Working under the guidance of senior engineers, you'll participate in engineering calculations, equipment selection, and specification development while coordinating designs with architectural and other engineering disciplines.

You will support senior engineers in the selection and specification of electrical equipment and contribute to project deliverables throughout all phases of design. Additionally, you will have opportunities to perform local field investigations and construction reviews,

We will rely on you to provide support to our project teams while fostering a culture of continuous learning, collaboration, and inclusion. You'll gain exposure to project management, client interaction, multidisciplinary coordination, and industry-standard design software while developing both your technical and professional skills.

To be successful in this position, you will need strong analytical, conceptual, communication, problem-solving, and organizational skills. Our ideal candidate is passionate about building systems design and has a foundational understanding of electrical power distribution systems through coursework, internships, co-op experiences, research projects, or relevant work experience.

Here's what you'll need

- Bachelor of Science in Electrical Engineering from an ABET accredited college or university.
- Knowledge of Microsoft Office (Excel, Word, Access).
- Strong communication skills both verbal and written.
- Strong analytical and problem-solving skills.
- Displayed ability to learn quickly and driven to broaden knowledge base.
- Ability to collaborate and work effectively in a variety of teams, including multi-disciplinary teams.
- Authorization to work in the United States without the need for visa sponsorship, now or in the future

Posted Salary Range: Minimum

62,500.00

Posted Salary Range: Upper

85,000.00

Our health and welfare benefits are designed to invest in you, and in the things you care about. Your health. Your well-being. Your security. Your future. Employees have access to medical, dental, vision, and basic life insurance, a 401(k) plan, and the ability to purchase company stock at a discount. Eligible employees may also enroll in a deferred compensation plan or the Executive Deferral Plan. Jacobs has an unlimited U.S. Personalized Paid Time Off (PPTO) policy for full-time salaried/exempt employees, seven paid holidays, and caregiver leave. And certain roles may be eligible for additional rewards, including merit increases, performance discretionary bonus, and stock.

The base salary range for this position is $62,500.00 to $85,000.00. Within the range, individual pay is determined by work location and additional factors, including job-related skills, experience, and relevant education or training.

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability or protected veteran status. Job posted on October 07, 2026. This position will be open for at least 3 days.

We value collaboration and believe that in-person interactions are crucial for both our culture and client delivery. We empower employees with our hybrid working policy, allowing them to split their work week between Jacobs offices/projects and remote locations enabling them to deliver their best work.

Your application experience is important to us, and we’re keen to adapt to make every interaction even better. If you require further support or reasonable adjustments with regards to the recruitment process (for example, you require the application form in a different format), please contact the team via Careers Support .
