Who We Are

Founded in 1994, Surveying And Mapping, LLC (SAM) is a nationwide leader in geospatial and construction-phase solutions. With more than 50 offices and 1,600 professionals, we deliver the scale, technology, and expertise needed to support projects of any size. SAM streamlines project delivery through a single, coordinated team, offering in-house capabilities across land surveying, aerial mapping, subsurface utility engineering (SUE), utility coordination (UC), GIS, BIM, and construction engineering inspection (CEI).

By combining advanced technology, digital workflows, and decades of experience, we provide accurate, actionable data that helps clients move critical infrastructure projects forward with confidence. At SAM, you'll be part of a team that values innovation, growth, and the opportunity to make a tangible impact on the built environment.

Your Impact at SAM

Are you ready to experience a side of surveying you may not have seen in the classroom? Do you enjoy working outdoors, learning new technology, and taking on new challenges? If so, SAM's Summer Internship is for you! Get hands-on experience with cutting-edge technology, explore the great outdoors, and contribute to real-world projects while building connections with industry leaders and experienced professionals.

The 2027 Summer Internship runs from May 17 through August 6, with opportunities available across the U.S. Housing stipends are available to students who meet eligibility requirements.

What You'll Do:

Support field operations by reviewing project plans and working alongside surveyors, engineers, and project managers to complete fieldwork safely and efficiently.

Research project sites by examining property records, deeds, and historical surveys to better understand site boundaries and conditions.

Operate advanced survey equipment including total stations, GPS receivers, levels, and data collectors to measure distances, angles, and elevations accurately.

Establish survey control by setting control points, benchmarks, and reference markers to ensure accurate and reliable measurements.

Explore surveying technology and software by transitioning from fieldwork to data processing and learning tools such as AutoCAD, Civil 3D, MicroStation, and other drafting software.

Turn field data into deliverables by processing measurements, creating maps, and preparing detailed survey reports for clients.

What You Bring to SAM

- Enrollment in a 2 or 4-year Land Surveying, Geomatics or relevant program
- Aspiring Professional Surveyor
- GPA of 2.5 or higher
- Passionate about the outdoors and eager to explore different terrains
- A positive attitude, adaptability, and willingness to learn and grow

Our Perks

- Gain practical experience by working on diverse projects and contributing to impactful initiatives
- Receive mentorship from expert professionals, learning the technical skills for success
- Lunch with SAM's Leadership for a Q&A to learn more about SAM as a company and how to advance in your career
- Embrace professional growth by joining our Intern Insights meetings with industry-leading experts throughout your internship
- Chance to win a scholarship by participating in our end of summer intern project - enhancing your leadership, problem-solving, and presentation skills
- Opportunity to work part-time after internship

Salary Maximum

USD $20.00/per hour

Salary Minimum

USD $17.00/per hour
