Industry Advanced Manufacturing

At Jacobs, we're challenging today to reinvent tomorrow by solving the world's most critical problems for thriving cities, resilient environments, mission-critical outcomes, operational advancement, scientific discovery and cutting-edge manufacturing, turning abstract ideas into realities that transform the world for good.

Your impact

We're looking for an Entry-Level Mechanical Engineer in Electronics business unit based in Tempe, AZ metro area who is excited about working on projects that enable the heart of our clients' business. Join us and you'll have the chance to work on projects including state-of-the-art industrial facilities. You'll be accountable for schedule and technical quality of challenging engineering tasks, as you gain familiarity with the client's expectations, scope, budget and schedule. You may also provide on-site assistance during startup, coordinating work activities with other staff members and the discipline lead. Your multi-discipline, highly interactive team will successfully deliver on the design, development, application, evaluation, recommendation, and specification of engineered systems and products for building HVAC, Plumbing, and Fire Protection Systems. This Position is intended to develop experience, communication skills, the practical application of knowledge, and familiarity with the project execution processes

As part of our team, you'll be surrounded by expert mentorship opportunities to help you thrive in your new career. Bring your curiosity, talent for multi-tasking and collaboration, and extreme organizational skills and we'll help you grow, pursue and fulfill what drives you – so we can make big impacts on the world, together.

This is a hybrid entry level position. Candidates will work from Jacob's office 2-3 days a week, with the option of working from home or the office on other days. There may be opportunities to visit client sites depending on project needs.

General Tasks Performed:

- Performs and properly documents/annotates engineering calculations
- Develop drawings for equipment layouts and facility systems and interconnects
- Selects equipment using standard sizing guidelines and specifications
- Develops clear understanding and documents scope, schedule, and deliverables
- Develops communication and presentation skills, coordinates information flow within design team and across the disciplines
- Assists with project delivery tasks including client issue tracking, change control, and responding to contractor questions and equipment submittals

Here's what you'll need

- Bachelor of Science in Mechanical Engineering, or closely related major
- Ability to report a minimum of twice per week to the local office
- Visa Sponsorship is not available for this role

Ideally you will also have

- Engineer in Training (EIT) or in progress
- Working knowledge of AutoCAD, Revit or other 3D modeling software
- Strong written and verbal communication skills
- Strong analytical and problem-solving skills
- Forward thinking, eager to learn best practices, and contribute with innovative ideas
- Displayed ability to learn quickly and driven to broaden knowledge base
- Ability to collaborate and work effectively in a variety of teams, including multi-disciplinary and international teams
- Demonstrated ability to plan and organize own work and activities of others to successfully meet project deadlines
- Passion for buildings and construction, prior construction or facility design experience preferred

Posted Salary Range: Minimum

58,656.00

Posted Salary Range: Upper

88,000.00

Our health and welfare benefits are designed to invest in you, and in the things you care about. Your health. Your well-being. Your security. Your future. Employees have access to medical, dental, vision, and basic life insurance, a 401(k) plan, and the ability to purchase company stock at a discount. Eligible employees may also enroll in a deferred compensation plan or the Executive Deferral Plan. Jacobs has an unlimited U.S. Personalized Paid Time Off (PPTO) policy for full-time salaried/exempt employees, seven paid holidays, and caregiver leave. And certain roles may be eligible for additional rewards, including merit increases, performance discretionary bonus, and stock.

The base salary range for this position is $58,656.00 to $88,000.00. Within the range, individual pay is determined by work location and additional factors, including job-related skills, experience, and relevant education or training.

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability or protected veteran status. Job posted on September 30, 2026. This position will be open for at least 3 days.

We value collaboration and believe that in-person interactions are crucial for both our culture and client delivery. We empower employees with our hybrid working policy, allowing them to split their work week between Jacobs offices/projects and remote locations enabling them to deliver their best work.

Your application experience is important to us, and we’re keen to adapt to make every interaction even better. If you require further support or reasonable adjustments with regards to the recruitment process (for example, you require the application form in a different format), please contact the team via Careers Support .
