## Job description

### Job Summary

As a Mechanical Engineer you will work with the guidance and supervision of a Senior Engineer on large projects performing tasks such as calculating heating/cooling load estimates, HVAC system sizing and selection, and modeling systems in Revit. Additionally, you will be expected to work under supervision of a Project Manager leading the complete design of mechanical systems on a variety of smaller projects, including specification for engineered systems or products for a project verifying compliance with applicable codes and engineering standards/practices.

The ideal candidate will have 5+ years' experience.

### Qualifications

· Bachelor's degree in Mechanical Engineering or equivalent

· Registered E.I.T. or P.E. in state of Texas preferred

· AutoCAD, REVIT knowledge

· Excellent written and verbal communication skills

· Experience in managing multiple projects simultaneously

· Candidate should have an active interest in personal growth and development

· Strong problem solving, technical, math and science skills
