> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Help build new natural-gas pipeline systems and maintain existing ones (materials, procedures, codes, inspection)
- Design system mains, regulator and meter settings, and corrosion-control protection
- Assist in designing, monitoring and analyzing pipeline systems (regulation, measurement, gas loss/gain)
- Evaluate the effectiveness of leakage surveys
- Ensure compliance with federal, state and local regulations
- Coordinate between Engineering and Operations to keep projects on schedule

What they ask for

- Bachelor's degree in Engineering
- Valid driver's license
- Explain technical concepts to audiences with different expertise
- Apply algebra, trigonometry, geometry and moderate statistics
- Advanced software skills for reports and graphics
- Pass DOT/PHMSA drug testing and motor-vehicle checks (safety-sensitive role)
