> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Design, build and deploy production-grade software
- Choose an area: fleet software & embedded systems, internal cloud, market infrastructure, or product apps
- Improve reliability, performance and scalability of systems
- Own projects end to end
- Ship real features from day one

What they ask for

- Solid fundamentals: data structures, algorithms, systems design
- Track record of building working software
- Clear, concise communication
- Curiosity and drive to solve real-world problems
- Full-time, in person in Austin (no remote)
