> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

## Posting summary

### What you would do

- Write code to deliver functional software solutions
- Deploy and iterate with CI/CD tools
- Design data integration and data management tools
- Use AI-assisted tools (e.g., GitHub Copilot) within quality and security standards
- Application track: API development, Azure Data Factory, vendor software support

### What they ask for

- Enrolled in a qualifying bachelor's or master's program
- Unofficial transcript and online resume showing good standing
- Preferred: C#, Python, TypeScript, React, Node.js, SQL
- Preferred: Azure, GitHub Actions, Terraform, Kubernetes
- Preferred: REST APIs and Git-based workflows
- No visa sponsorship
