> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Learn the company's energy assets: gathering, processing, transmission, storage and export of natural gas/liquids
- Perform process simulation and system modeling
- Take gas and fluid flow measurements
- Complete pipe and vessel sizing calculations
- Review equipment functions and maintenance requirements
- Support day-to-day field operations for pipeline, storage and terminal systems

What they ask for

- Enrolled in an undergraduate chemical, mechanical, civil or electrical engineering program
- At least sophomore-level engineering coursework completed
- Above-average GPA; involvement in activities outside class
- Proficient with MS Office
- Willing to learn and to travel
- Strong attention to detail and written/verbal communication
