> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Write and run automated tests based on product test plans
- Build Python and Robot Framework scripts to test utility radio-communications products
- Expand test plans into detailed test cases
- Set up test environments (Robot Framework, LabVIEW, TestStand, Selenium)
- Log defects and track work in Jira
- Assemble and maintain hardware test setups

What they ask for

- Enrolled full-time in a relevant BS/MS program; at least 2 years completed
- Minimum 3.0 GPA
- Test automation tools (Selenium, Playwright or Cypress)
- Python scripting; Linux and basic networking
- Git, GitHub and GitHub Actions
- Authorized to work in the US without sponsorship
