Posting summary

What you would do

- Support physics-based research and computational modeling for drilling (trajectory, well, tubular design)
- Turn engineering equations and numerical methods into tested software prototypes
- Build AI-enabled features and agents for engineering analysis
- Validate models and AI results against engineering principles and data
- Document and present methods and results
- Collaborate with drilling engineers, researchers and developers

What they ask for

- Enrolled in an MS or PhD program (PhD preferred)
- Coursework/research in physics-based modeling (hydraulics, mechanics, numerical simulation)
- Programming in Python, C++, C# or similar
- Experience applying machine learning or generative AI
- Preferred: Git, VS Code, Jupyter
- Unrestricted US work authorization
