> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Prepare plans, standards and operating procedures that follow good engineering practice
- Build and maintain computer models that simulate the electric delivery system
- Plan and design system expansion to meet current and future demand at competitive cost
- Keep personnel and public safety a priority in project design and operation
- Work across groups to resolve issues; present detailed documentation and designs
- Manage a large number of projects while keeping quality and reliability high

What they ask for

- Bachelor's degree in Electrical Engineering (required)
- Associate Engineer: 0–2 years of applicable engineering experience encouraged
- SQL and/or Python experience preferred
- Apply complex analysis to find the best solution to technical problems
- Ensure solutions meet legal, regulatory, code and safety requirements
- Communicate clearly, document work and share knowledge with others
