> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Write and debug Go and Python software for station automation and tester integration
- Help write in-process and end-of-line test specifications
- Analyze production test data for yield, cycle time and failure patterns
- Debug failing units with CAN analyzers, logs, oscilloscopes, power supplies and loads
- Bring up production testers that validate firmware before release
- Support flashing, provisioning and firmware releases for energy products

What they ask for

- Enrolled in engineering, CS or related program
- Python and/or Go experience
- Coursework or internships in manufacturing, test or embedded systems
- Debug embedded products using CAN/serial buses and electrical test equipment
- Interest in power electronics, battery systems or high-voltage energy products
- Able to work 40 hrs/week onsite in Buffalo (relocation required)

Summary sheet details

EE sheet (EE-8): Majors / requirement: Electrical engineering, computer engineering, computer science or related · Pay: $20–$50/hr · Dates: Posted ~Sep 2026; starts Jan 2027, through spring or summer 2027 · Status (as of Oct 23, 2026): Open · Location: Buffalo, NY (Gigafactory New York) (US) · Type: Internship

CE sheet (CE-3): Majors / requirement: Electrical engineering, computer engineering, computer science or related · Pay: $20–$50/hr · Dates: Posted ~Sep 2026; starts Jan 2027, through spring or summer 2027 · Status (as of Oct 23, 2026): Open · Location: Buffalo, NY (Gigafactory New York) (US) · Type: Internship
