> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Lead software/firmware programs for residential, charging and industrial energy products
- Coordinate firmware and system-integration teams on release scope, validation and pilots
- Build and manage project plans and schedules
- Analyze data to report progress, risks and opportunities
- Work with product, service and field teams on firmware trials
- Run stand-ups and communicate status across teams

What they ask for

- Enrolled in an engineering or CS degree program
- Familiarity with firmware and software development concepts
- Experience managing a project from concept through launch
- Strong organization and delegation skills
- Preferred: past engineering internship; MS Project/PowerPoint
- Able to work 40 hrs/week in person
