> Paraphrased summary of the posting as it appeared on Oct 23, 2026, prepared for ECS 1100. Wording is condensed, not the employer's full text. Postings change and close often; open the link above for the current version before sharing with students.

Posting summary

What you would do

- Support fleet mechanical issues for rotating equipment and develop action plans
- Support investigations of operational anomalies
- Develop scope and design information for component inspections and repairs
- Work with engineering, operations and maintenance groups on practical solutions
- Rotate through plant areas (safety, operations, maintenance, I&C, reliability) in the EIT program
- Travel to power-plant field sites up to once a week

What they ask for

- Pursuing a BS or MS in Mechanical Engineering or comparable degree
- US citizen or permanent resident (OPT/CPT not eligible)
- Good academic standing; official transcripts before start
- Proficient in Excel, Word and PowerPoint
- Strong verbal and written communication
- Works independently in a fast-paced environment
