Job description

Company Description

Join us and make YOUR mark on the World!

Lawrence Livermore National Laboratory (LLNL) has turned bold ideas into world-changing impact advancing science and technology to strengthen U.S. security and promote global stability.

Our mission spans four critical national security areas nuclear deterrence, threat preparedness, energy security, and multi-domain defense empowering teams to take on the toughest challenges of today and tomorrow. With a culture built on innovation and operational excellence, LLNL is a place where your expertise can make a real impact.

Job Description

We have an opening for an early or mid-career Industrial Hygienist specializing in Industrial Hygiene (IH) to provide comprehensive support to LLNL programs and operations within our Environment Safety & Health Directorate (ESH). These positions will be on one of the Integrated Safety Teams that directly supports the mission work of the Laboratory. You will interact with all levels of workers and management to perform your job, including external regulatory agencies.

This position may offer a hybrid schedule, which includes the flexibility to work from home one or more days per week, after a probationary period. The specifics of the hybrid schedule, including the exact number of days required in the office and virtual work options may vary based on the needs of the team and the organization.

This position will be filled at either level based on knowledge and related experience as assessed by the hiring team. Additional job responsibilities (outlined below) will be assigned if hired at the higher level.

You will

- Under limited direction, provide comprehensive industrial hygiene support for one of the Laboratory's directorates to ensure worker safety and compliance with applicable federal, state, local regulations, and DOE orders.
- Understand IH hazards in your assigned directorate that are moderately complex to complex and report regularly to line management on the issues associated with regulatory compliance in the directorate you support.
- Develop working relationships with line managers and workers in your assigned directorate and maintain field presence to nurture those relationships.

- Evaluate work activities and work with line management to identify hazards and recommend controls, and observe work being performed to ensure controls are adequate.
- Conduct health and safety evaluations and inspections of buildings, equipment and apparatus to identify hazards and deficiencies, review collected data, identify trends, and provide recommendations to resolve and prevent recurrence of health & safety (H&S) and occupational exposures.
- Serve as the program owner of at least one IH program for the institution.
- Write and review technical reports. Review and evaluate new/changed H&S standards, procedures, engineering drawings, and diagrams for conformance to H&S workplace standards.
- Provide emergency response support to incidents on-site.
- Satisfactorily complete the ESH Professional qualification requirements.
- Perform other duties as assigned.

Additional Job Responsibilities, At The TSS.3 Level

- Independently provide advanced professional support to LLNL directorates.
- Mentor less experienced Health & Safety personnel.
- Serve as a program owner for one or more advanced IH Programs for the institution.

Qualifications

- Ability to secure and maintain a U.S. DOE Q-level security clearance which requires U.S. citizenship.
- Bachelor’s degree or higher in scientific, technical, health and safety, industrial hygiene or related field, or the equivalent level of demonstrated education, skills and experience.
- Experience providing moderately complex to complex technical guidance, using knowledge of federal regulations and consensus standards, in anticipation, recognition, measurement and control of exposure to physical, chemical, biological, and ergonomic stress factors. Ability to interpret exposure monitoring results and compare to legal standards. Ability to qualify and quantify occupational exposures and devise corrective actions.
- Experience in industrial, research and development, large science, and/or construction/demolition settings.
- Broad experience with or comprehensive knowledge of at least two of the following: 1) Conducting safety audits, preparing safety plans and technical reports, and successfully working potential worker safety and compliance issues with program customers and external regulators. 2) Participating in emergency response and investigations of incidents or accidents. 3) Experience applying incident analysis tools (fault tree, 5-why causal analysis, blue dragon). 4) Conducting personal exposure monitoring
- Experience building strong working relationships and trust with a demanding customer base, a strong customer service ethos, and results driven orientation.
- Experience working under limited direction and in a team environment with a broad cross-section of people and organizations, managing moderately complex to complex projects, and meeting schedules.
- Situational awareness, problem solving, decision making, and analytical skills necessary to evaluate, interpret, recommend, and reduce/resolve workplace hazards.
- Proficient communication, facilitation, collaboration, interpersonal, and conflict resolution skills necessary to effectively explain, direct, present, advise, negotiate, and influence worker, supervisor, and manager decisions/work practices to reduce workplace hazards.

Additional Qualifications At The TSS.3 Level

- Advanced experience in two or more of the following: 1) Presenting and communicating complex technical information to management, workers, and regulators. 2) Providing technical direction and leadership to health and safety staff on safety related matters. 3) Reviewing and interpreting new health and safety standards and conducting a gap analysis against existing requirements. 4) Identifying Similar Exposure Groups, collecting and compiling exposure monitoring data, and confirming adequacy of controls.
- Advanced knowledge of federal regulations and other consensus standards.
- Experience managing ESH programs and developing and tracking performance metrics.
- Advanced situational awareness, communication, interpersonal, and conflict resolution skills necessary to collaborate in a team environment for synergy. Present and communicate complex technical information to all levels of management, laboratory personnel, regulatory agencies, and key stakeholders.

Qualifications We Desire

- Master’s degree in Industrial Hygiene or other scientific, technical or health and safety related field.

- CIH Certification by Board for Global ESH Credentialing
- Knowledge of Department of Energy (DOE) Orders.
- Experience implementing safety programs associated with characterization and demolition of contaminated facilities and impacted sites in both laboratory R&D and industrial settings.

Pay Range: $129,150- $196,476 Annually

$129,150- $163,764 Annually for the TSS.2 level $154,950 - $196,476 Annually for the TSS.3 level

This is the lowest to highest salary we in good faith believe we would pay for this role at the time of this posting; pay will not be below any applicable local minimum wage. An employee's position within the salary range will be based on several factors including, but not limited to, specific competencies, relevant education, qualifications, certifications, experience, skills, seniority, geographic location, performance, and business or organizational needs.

Additional Information

#LI-Hybrid

Position Information

This is a Flexible Term appointment, which is for a definite period not to exceed six years. If final candidate is a Career Indefinite employee, Career Indefinite status may be maintained (should funding allow).

Why Lawrence Livermore National Laboratory?

- Included in 2026 Best Places to Work by Glassdoor!
- Flexible Benefits Package
- 401(k)
- Relocation Assistance
- Education Reimbursement Program
- Flexible schedules (*depending on project needs)
- Our values - visit https://www.llnl.gov/inclusion/our-values

Security Clearance

This position requires a Department of Energy (DOE) Q-level clearance. If you are selected, we will initiate a Federal background investigation to determine if you meet eligibility requirements for access to classified information or matter. Also, all L or Q cleared employees are subject to random drug testing. Q-level clearance requires U.S. citizenship.

Pre-Employment Drug Test

External applicant(s) selected for this position must pass a post-offer, pre-employment drug test. This includes testing for use of marijuana as Federal Law applies to us as a Federal Contractor.

Wireless and Medical Devices

Per the Department of Energy (DOE), Lawrence Livermore National Laboratory must meet certain restrictions with the use and/or possession of mobile devices in Limited Areas. Depending on your job duties, you may be required to work in a Limited Area where you are not permitted to have a personal and/or laboratory mobile device in your possession. This includes, but not limited to cell phones, tablets, fitness devices, wireless headphones, and other Bluetooth/wireless enabled devices.

If you use a medical device, which pairs with a mobile device, you must still follow the rules concerning the mobile device in individual sections within Limited Areas. Sensitive Compartmented Information Facilities require separate approval. Hearing aids without wireless capabilities or wireless that has been disabled are allowed in Limited Areas, Secure Space and Transit/Buffer Space within buildings.

How to identify fake job advertisements

Please be aware of recruitment scams where people or entities are misusing the name of Lawrence Livermore National Laboratory (LLNL) to post fake job advertisements. LLNL never extends an offer without a personal interview and will never charge a fee for joining our company. All current job openings are displayed on the Career Page under "Find Your Job" of our website. If you have encountered a job posting or have been approached with a job offer that you suspect may be fraudulent, we strongly recommend you do not respond.

Equal Employment Opportunity

We are an equal opportunity employer that is committed to providing all with a work environment free of discrimination and harassment. All qualified applicants will receive consideration for employment without regard to race, color, religion, marital status, national origin, ancestry, sex, sexual orientation, gender identity, disability, medical condition, pregnancy, protected veteran status, age, citizenship, or any other characteristic protected by applicable laws.

Reasonable Accommodation

Our goal is to create an accessible and inclusive experience for all candidates applying and interviewing at the Laboratory. If you need a reasonable accommodation during the application or the recruiting process, please use our online form to submit a request.

California Privacy Notice

The California Consumer Privacy Act (CCPA) grants privacy rights to all California residents. The law also entitles job applicants, employees, and non-employee workers to be notified of what personal information LLNL collects and for what purpose. The Employee Privacy Notice can be accessed here.
