Job description

About Us

Working at the Naval Nuclear Laboratory we foster pride in belonging to an organization whose culture is made up of these core values: Trust, Empowerment, and Collaboration. Our company promotes a positive culture while ensuring the safety and reliability of our nation's naval nuclear reactors, and training the Sailors who operate those reactors in the U.S. Navy's submarines and aircraft carrier Fleets. Looking for a lifetime career? Apply today!

Job Description

The Naval Nuclear Laboratory is seeking an experienced Industrial Hygienist to join the Kesselring Site Safety and Health team!

The Safety and Health organization manages a comprehensive industrial hygiene program designed to reduce the risk of work-related disease or illness. The Industrial Hygienist performs surveys of work areas and operations to evaluate potential worker health risk and documents exposure assessments for chemical, physical, and biological agents and ergonomic stressors using recognized exposure assessment methodologies and use of accredited IH laboratories. In addition, all Safety and Health personnel perform independent overviews and assessments of site work to ensure that operations are conducted safely, efficiently and in compliance with applicable requirements (e.g., OSHA, NFPA, and ANSI standards).

Opportunities for this position include, but are not limited to:

- Anticipate, identify, and evaluate hazardous conditions and practices
- Collaborate with engineering and production organizations and provide subject matter expertise to determine hazard controls
- Conduct inspections of site facilities and provide oversight of site operations, preventative and corrective maintenance tasks, building construction, renovation, and demolition
- Measure, audit, and evaluate the effectiveness of hazard controls and hazard control programs to ensure compliance with safety standards and requirements
- Identify and develop process improvements to ensure safe and efficient site operations, and involve personnel at all levels in developing the safety culture

Required Combination of Knowledge and Skill

Bachelors degree from an accredited college or university in a related technical, engineering or science field and a minimum of 9 years of relevant experience; or Masters degree from an accredited college or university in a related technical, engineering or science field and a minimum of 7 years of relevant experience; or Doctorate degree from an accredited college or university in a related technical, engineering or science field and a minimum of 3 years of relevant experience; or Currently an Principal Reactor Training Engineer, Refueling Engineer, or Field (RPCO) Engineer at the Company.

Additional Required Skills:

- Certified Industrial Hygienist (CIH)
- Experience with the selection and use of industrial hygiene monitoring equipment

Preferred Skills

- Experience with AIHA exposure assessment process
- Comprehensive knowledge of regulatory requirements in 29 CFR 1910 and/or 29 CFR 1926 (OSHA), as well as national safety consensus standards (ANSI, NFPA)
- Ability to manage multiple short- and long-term work deliverables in a team environment
- Experience interacting with a diverse workforce including engineers, skilled tradespersons, scientists, and technicians
- Strong analytical and technical writing skills

Compensation and Benefits

- Health, Dental, Vision & Voluntary Benefits
- Disability, Life & Accident Insurance
- 401(k) Savings program & Capital Accumulation Plan
- Personal & Medical Time Off
- Paid Parental Leave
- Flexible Work Schedules
- Tuition Assistance for Eligible Employees
- Student Debt Benefit Personal Time Off Sell Program
- Employee Assistance Program (EAP)
- Wellness Program
- Visit us online to view all NNL benefits!

Pay Range

$106,200.00 - $166,000.00 annually Salary information provided is a general guideline only. Annual salary is based upon candidate experience and qualifications, as well as market and business considerations.

The Naval Nuclear Laboratory is operated for the U.S. Department of Energy (DOE) by Fluor Marine Propulsion, LLC (FMP), a wholly owned subsidiary of Fluor Corporation. Naval Nuclear Laboratory personnel are FMP employees who work at four DOE facilities: Bettis Atomic Power Laboratory, Knolls Atomic Power Laboratory, Kenneth A. Kesselring Site, and Naval Reactors Facility, and at the U.S. Department of Defense-owned Nuclear Power Training Unit-Charleston. FMP employees also have an established presence at numerous shipyards, satellite, and vendor locations.

For more than 75 years, the Naval Nuclear Laboratory has developed advanced nuclear propulsion technology, provided technical support, and trained world-class nuclear operators to ensure the safe and reliable operation of our nation's submarine and aircraft carrier fleets. The Naval Nuclear Laboratory is a national asset solely dedicated to the Naval Nuclear Propulsion Program. We rely on the dedication and innovation of our nearly 8000 engineers, scientists, technicians, and support personnel.

All candidates must be U.S. citizens. Applicants selected will be subject to a Federal background investigation and must meet eligibility requirements for access to classified matter. FMP is a government contractor and maintains a drug free workplace and workforce. All candidates must be able to pass a drug test in compliance with FMP company policy and 10 CFR 707. Marijuana is a Federal Schedule I controlled substance and illegal under Federal Law. Therefore, FMP is required to test for marijuana.

Fluor Marine Propulsion, LLC is an Equal Opportunity Employer, including disability/vets. All qualified applicants will receive consideration for employment without regard to race, color, age, sex, religion, national origin, disability, veteran status, genetic information, or any other criteria protected by federal, state, or local law.
