Job description

WHY UT SOUTHWESTERN?

With over 75 years of excellence in Dallas-Fort Worth, Texas, UT Southwestern is committed to excellence, innovation, teamwork, and compassion. As a world-renowned medical and research center, we strive to provide the best possible care, resources, and benefits for our valued employees. Ranked as the number 1 hospital in Dallas-Fort Worth according to U.S. News & World Report , we invest in you with opportunities for career growth and development to align with your future goals. Our highly competitive benefits package offers healthcare, PTO and paid holidays, on-site childcare, wage, merit increases and so much more. We invite you to be a part of the UT Southwestern team where you'll discover a culture of teamwork, professionalism, and a rewarding career!

JOB SUMMARY

Perform professional work in support of scientific research using technical knowledge of software, software development, networking, and/or hardware in a complex computing environment. Subject matter expert in multiple areas of computing technology, and specific knowledge of molecular biology and genetics. Works collaboratively with Principal Investigator ("PI") to determine the most suitable computational methods and tools to analyze large-scale biological data sets. Prepare reports for presentation or publication. Responsible for assisting PI in meeting the system needs for multiple research projects and/or labs.

The Choi Laboratory within the Center for Cellular Therapies and Cancer Immunology at UT Southwestern conducts interdisciplinary research at the intersection of cancer immunology, cellular therapy, immune engineering, and AI-enabled biomedical discovery. The Computational Biologist I will work collaboratively with the Principal Investigator, Dr. Jaehyuk Choi, and a multidisciplinary team of computational and experimental researchers 1) to analyze and manage large-scale genomic, single-cell, spatial, clinical, and other multi-omic datasets and 2) to implement novel computational methods to analyze and engineer new proteins. The position will help identify, implement, and refine appropriate bioinformatics, statistical, and computational methods to produce reproducible analyses and translate complex data into meaningful biological insights.

Responsibilities include developing and maintaining computational workflows, software tools, databases, and research computing resources; supporting data visualization and interpretation; and contributing to machine-learning and other advanced analytical approaches as appropriate to project needs. The Computational Biologist I will document code, methods,

and results; prepare analyses and reports for presentations, publications, and collaborative discussions; and provide technical support and training related to laboratory computational systems. This position will support multiple collaborative research projects aimed at advancing the understanding of immune biology and accelerating the development of innovative cellular and immune-based therapies.

BENEFITS

UT Southwestern is proud to offer a competitive and comprehensive benefits package to eligible employees. Our benefits are designed to support your overall wellbeing, and include:

PPO medical plan, available day one at no cost for full-time employee-only coverage

100% coverage for preventive healthcare-no copay

Paid Time Off, available day one

Retirement Programs through the Teacher Retirement System of Texas (TRS)

Paid Parental Leave Benefit

Wellness programs

Tuition Reimbursement

Public Service Loan Forgiveness (PSLF) Qualified Employer

Learn more about these and other UTSW employee benefits!

EXPERIENCE AND EDUCATION

Required

Education

Master's Degree In Computer Science or a related field of biological science or

Bachelor's Degree In Computer Science or a related field of biological science

Experience

2 years Related research experience in bioinformatics and computational biology with Bachelor's Degree

JOB DUTIES

Manage research laboratory computer hardware and software programming and maintenance. Ensure existing systems meet the continuing needs of the lab and/or recommend and test new systems as necessary.

Perform complex data analysis related to specialized research methodologies and results as assigned by the PI.

Develop and/or modify software to support new and ongoing research projects.

Resolve hardware, software, and network issues in support of the lab.

Develop and maintain complex databases to support new and ongoing research projects.

Train laboratory staff in the use of pertinent research systems.

May specialize in bioinformatics, software development, network administration, or hardware/software maintenance.

Perform other duties as assigned.

SECURITY AND EEO STATEMENT

Security

This position is security-sensitive and subject to Texas Education Code 51.215, which authorizes UT Southwestern to obtain criminal history record information.

EEO

UT Southwestern Medical Center is committed to an educational and working environment that provides equal opportunity to all members of the University community. As an equal opportunity employer, UT Southwestern prohibits unlawful discrimination, including discrimination on the basis of race, color, religion, national origin, sex, sexual orientation, gender identity, gender expression, age, disability, genetic information, citizenship status, or veteran status.

Notes for ECS 1100 students

How this connects to your major

Data Science: healthcare data analysis, data engineering, statistics, AI or computational biology; Computer Science: healthcare software, embedded systems, automation or secure computing. These are teaching annotations, not an employer guarantee of eligibility.

Use the degree and experience evidence to distinguish a first job from a later career step.

DS: Named discipline appears in source; consult qualifications for eligibility

CS: Named discipline appears in source; consult qualifications for eligibility

Skills mentioned in the posting

Statistics, Data visualization, Genomics/bioinformatics, Communication/teamwork

Eligibility excerpts not shown above

Compensation (source excerpts): Not stated in captured posting text.

Course sheet tags

Majors (teaching tags): DS; CS; Career stage (teaching tag): Professional; check stated experience; Geography: DFW; Recruiting status at capture: Posting readable at capture; no closure notice found; Employment type: Full-time.
