Job Description

Join Amgen's Mission of Serving Patients

At Amgen, if you feel like you're part of something bigger, it's because you are. Our shared mission-to serve patients living with serious illnesses-drives all that we do.

Since 1980, we've helped pioneer the world of biotech in our fight against the world's toughest diseases. With our focus on four therapeutic areas -Oncology, Inflammation, General Medicine, and Rare Disease- we reach millions of patients each year. Amgen is advancing a broad and deep pipeline of medicines to treat cancer, heart disease, inflammatory conditions, rare diseases, and obesity and obesity-related conditions. As a member of the Amgen team, you'll help make a lasting impact on the lives of patients as we research, manufacture, and deliver innovative medicines to help people live longer, fuller happier lives.

Our award-winning culture is collaborative, innovative, and science based. If you have a passion for challenges and the opportunities that lay within them, you'll thrive as part of the Amgen team. Join us and transform the lives of patients while transforming your career.

Undergrad Intern - Machine Learning Engineer - Technology, AI & Data (Summer 2027)

What You Will Do

Let's do this. Let's change the world. During this internship, you will acquire the valuable hands-on skills and foundational experience needed to become a professional in your chosen field.

This role requires you to assist in the design, development, and testing of scalable data pipelines for data ingestion and transformation from multiple data sources into enterprise data lakes and warehouses. Responsibilities may include:

Work closely with expert data engineers and scientists to clean, prepare, and analyze structured and unstructured data

Support the development and automation of model training, evaluation, and deployment pipelines

Help explore and analyze pharmaceutical commercial datasets for data-driven insights

Participate in the design of informative visualizations and dashboards for internal stakeholders

Learn and apply statistical techniques including hypothesis testing, regression, and classification

Collaborate with the team on implementing and monitoring ML models in production environments

Contribute to the documentation of technical processes, models, and tools.

Experiment with new tools and techniques in data engineering and ML operations (MLOps)

Participate in agile ceremonies such as sprint planning and retrospectives to understand team workflow

Program Eligibility Requirements

Expected completion of one year of study from an accredited college or university prior to the internship commencing

Expected continued enrollment in an accredited college or university following the internship program

Student must be located in the United States for the duration of the internship program

Must be available to work a full-time schedule.

Must be available to accept and commit to future full-time employment by July 2028, if offered

What We Expect of You

We are all different, yet we all use our unique contributions to serve patients. The passionate and driven individual we seek exemplifies the following qualifications:

Basic Qualifications:

Amgen requires that all individuals applying for an undergrad internship or a co-op assignment at Amgen must meet the following criteria:

18 years or older

Currently enrolled in a full-time Bachelor’s Degree program from an accredited college or university with a 3.0 minimum GPA or equivalent

Preferred Qualifications

Degree concentration(s) in Information Technology, Computer Science (e.g., CS, CPE, SE), Engineering, Business, or related field

Biotechnology, pharmaceutical or health care industry experience

Intermediate knowledge of Microsoft Word, Excel and Power Point

Strong interpersonal, project management, analytical and quantitative skills

Demonstrated personal initiative, self-motivation, flexibility, adaptability and resourcefulness

Ability to operate independently, across functional lines, and with both internal and external customers

Foundational experience in Python or R, including use of libraries for data manipulation (e.g., pandas, NumPy), visualization (e.g., matplotlib, seaborn), and machine learning (e.g., scikit-learn, XGBoost)

Exposure to cloud platforms such as AWS, GCP, or Azure (coursework or personal projects)

Basic understanding of SQL and experience querying data from relational or big data sources

Interest or coursework in NLP, time-series analysis, or statistical modeling

Familiarity with version control tools (e.g., Git) and collaborative coding practices

Awareness of tools like Databricks, Apache Spark, or Apache Airflow is a plus

Strong communication skills to optimally share technical findings with diverse audiences

Coursework in one or more of the following areas: Business Systems analysis, Lean, Agile (SCRUM) and other SDLC processes, Software Development, Database Modeling, Web Design and Development, IT Management, Management of Cloud based application, B2B Collaboration, Enterprise systems such as configuration and management of ERP, CRM systems

What You Can Expect of Us

As we work to develop treatments that take care of others, we also work to care for your professional and personal growth and well-being. From our competitive benefits to our collaborative culture, we’ll support your journey every step of the way.

The base pay range for this opportunity in the U.S. is $28.87 per hour.

Build a network of colleagues that will endure and grow throughout your time with us and beyond.

Bring your authentic self to the table and become the professional you’re inspired to be through accepting a culture that values the diversity of thought and experience and will flex to your strengths and possibilities.

Participate in executive and social networking events, as well as community volunteer projects.

Apply now and make a lasting impact with the Amgen team.

In any materials you submit, you may redact or remove age-identifying information such as age, date of birth, or dates of school attendance or graduation. You will not be penalized for redacting or removing this information.

Application deadline

Amgen does not have an application deadline for this position; we will continue accepting applications until we receive a sufficient number or select a candidate for the position.

Sponsorship

Candidates must be authorized to work in the U.S. for the duration of this program. Sponsorship for future FTE roles is not guaranteed.

As an organization dedicated to improving the quality of life for people around the world, Amgen fosters an inclusive environment of diverse, ethical, committed and highly accomplished people who respect each other and live the Amgen values to continue advancing science to serve patients. Together, we compete in the fight against serious disease.

Amgen is an Equal Opportunity employer and will consider all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status, disability status, or any other basis protected by applicable law.

We will ensure that individuals with disabilities are provided reasonable accommodation to participate in the job application or interview process, to perform essential job functions, and to receive other benefits and privileges of employment. Please contact us to request accommodation.

. Salary Range

USD - USD

Notes for ECS 1100 students

How this connects to your major

Computer Science: healthcare software, embedded systems, automation or secure computing; Data Science: healthcare data analysis, data engineering, statistics, AI or computational biology. These are teaching annotations, not an employer guarantee of eligibility.

Career exploration example. Enrollment, GPA, semester timing, experience, degree level and work authorization in the source determine eligibility; internship does not mean first-year eligible.

CS: Named discipline appears in source; consult qualifications for eligibility

DS: Teaching interpretation of role tasks; major eligibility is not explicitly confirmed

Skills mentioned in the posting

Python, SQL, R, Git/source control, Machine learning, Statistics, Data visualization, Cloud, Data pipelines/ETL, Communication/teamwork, Excel

Course sheet tags

Majors (teaching tags): CS; DS; Career stage (teaching tag): Internship / co-op; Geography: US remote; Recruiting status at capture: Posting readable at capture; no closure notice found; Employment type: Full time.
