Job description

Additional Location(s): N/A

Diversity - Innovation - Caring - Global Collaboration - Winning Spirit - High Performance

At Boston Scientific, we'll give you the opportunity to harness all that's within you by working in teams of diverse and high-performing employees, tackling some of the most important health industry challenges. With access to the latest tools, information and training, we'll help you in advancing your skills and career. Here, you'll be supported in progressing - whatever your ambitions.

We will consider qualified applicants of all ages who are starting (or restarting) their careers

At Boston Scientific, we value collaboration and synergy. This role follows a hybrid work model, requiring employees to be in our local office at least four days per week.

Relocation and housing assistance may be available to those who meet the eligibility criteria.

Boston Scientific will not offer sponsorship or take over sponsorship of an employment VISA for this position at this time

As a Process Development Co-op participant, you will collaborate cross-functionally to develop manufacturing processes to create innovative, breakthrough next-generation medical devices. We partner with R&D on the front end of projects, innovate to determine how to make a design come to fruition and partner with Operations to launch life-saving devices into the market that improve and extend the lives of patients around the world.

Your responsibilities will include:

Responsible for the integrity and content of Process Plans with respect to materials used in processing and sequencing of tasks

Collaborate with cross-functional teams to establish and refine manufacturing processes

Design, fabricate and test prototype devices to address clinical feedback

Conduct process characterization experiments and Process Validation to determine optimal settings to be used in device manufacturing

Investigate and recommend new technology to be utilized to create medical devices

Required Qualifications:

Must graduate between Fall 2028 - Spring 2030

Currently pursuing a bachelor’s or graduate level degree majoring in Biomedical Engineering, Chemical Engineering, or Material Science/Engineering

Must be able to commit to a full 8-month co-op assignment during one of the following timeframes:

January 11th, 2027 - August 13th, 2027, OR

May 17th or May 26th, 2027 - December 17th, 2027

Must be eligible to work in the U.S. without company sponsorship, now or in the future, for employment-based work authorization

Must have reliable transportation to and from the Maple Grove, MN Boston Scientific Corporate location

Preferred Qualifications:

Ability to communicate effectively with diverse, cross-functional teams

Passion to learn new technologies and find new solutions

Previous internship or co-op experience

Desire to work in a medical device company where real products get manufactured

Requisition ID: 634650

Minimum Salary: $ 43368

Maximum Salary: $ 73736

The anticipated compensation listed above and the value of core and optional employee benefits offered by Boston Scientific (BSC) - see www.bscbenefitsconnect.com-will vary based on actual location of the position and other pertinent factors considered in determining actual compensation for the role. Compensation will be commensurate with demonstrable level of experience and training, pertinent education including licensure and certifications, among other relevant business or organizational needs. At BSC, it is not typical for an individual to be hired near the bottom or top of the anticipated salary range listed above.

Compensation for non-exempt (hourly), non-sales roles may also include variable compensation from time to time (e.g., any overtime and shift differential) and annual bonus target (subject to plan eligibility and other requirements).

Compensation for exempt, non-sales roles may also include variable compensation, i.e., annual bonus target and long-term incentives (subject to plan eligibility and other requirements).

For MA positions: It is unlawful to require or administer a lie detector test for employment. Violators are subject to criminal penalties and civil liability.

Boston Scientific transforms lives through innovative medical technologies that improve the health of patients around the world. As a global medical technology leader for more than 45 years, we advance science for life by providing a broad range of high-performance solutions that address unmet patient needs and reduce the cost of healthcare. Our portfolio of devices and therapies helps physicians diagnose and treat complex cardiovascular, respiratory, digestive, oncological, neurological and urological diseases and conditions. Learn more at www.bostonscientific.com and follow us on LinkedIn.

Boston Scientific Corporation has been and will continue to be an equal opportunity employer. To ensure full implementation of its equal employment policy, the Company will continue to take steps to assure that recruitment, hiring, assignment, promotion, compensation, and all other personnel decisions are made and administered without regard to race, religion, color, national origin, citizenship, sex, sexual orientation, gender identity, gender expression, veteran status, age, mental or physical disability, genetic information or any other protected class.

Please be advised that certain US based positions, including without limitation field sales and service positions that call on hospitals and/or health care centers, require acceptable proof of COVID-19 vaccination status. Candidates will be notified during the interview and selection process if the role(s) for which they have applied require proof of vaccination as a condition of employment. Boston Scientific continues to evaluate its policies and protocols regarding the COVID-19 vaccine and will comply with all applicable state and federal law and healthcare credentialing requirements. As employees of the Company, you will be expected to meet the ongoing requirements for your roles, including any new requirements, should the Company’s policies or protocols change with regard to COVID-19 vaccination.

Among other requirements, Boston Scientific maintains specific prohibited substance test requirements for safety-sensitive positions. This role is deemed safety-sensitive and, as such, candidates will be subject to a prohibited substance test as a requirement. The goal of the prohibited substance testing is to increase workplace safety in compliance with the applicable law.

Notes for ECS 1100 students

Course spreadsheet notes

Skills mentioned: Process characterization and validation. Prototype fabrication/testing. Material process plans.

Materials Science

Materials Science/Engineering explicitly listed. Longer co-op commitment.

Degree: Pursuing bachelor’s or graduate degree (graduate level unspecified)

Experience / eligibility: Bachelor's or graduate student. Graduation Fall 2028-Spring 2030.
