Job description

Your Mission

Are you eager to gain hands-on experience in the research and development of innovative medical technologies and contribute to solutions that improve healthcare? In this MedTech internship, you will support our Computer-Assisted Surgery Test Laboratory in verifying, validating, and optimizing new products. You will work with modern technologies, analyze technical data, and gain insight into the product development process of a global medical technology company. Along the way, you will take ownership of your own projects, build valuable technical skills, and establish a strong foundation for your future career in medical technology.

What You Will Do

Support the planning, execution, and documentation of development-related tests and experiments

Analyze and evaluate measurement data to support engineering and development decisions

Contribute to the creation and optimization of test setups

Support the continuous improvement of testing strategies and procedures

Collaborate with international teams on innovative projects in the field of computer-assisted surgery

What You'll Bring

Currently pursuing a Bachelor's or Master's degree in Medical Engineering, Biomedical Engineering, Mechanical Engineering, Mechatronics, Information Technology, Electrical Engineering, or a related technical field

Initial experience with MATLAB, Python, C/C++, or similar programming languages

Ideally basic knowledge of CAD design, ideally using Creo Parametric

Interest in research, product development, testing methodologies, and technical analysis

Good German skills (B1) and good English skills (B2)

What's In It for You

Paid six-month full-time internship (voluntary internship alongside studies, mandatory internship, or a combination of both possible)

Start date: March or April 2027

Location: Freiburg, Germany

Flexible working hours and attractive vacation policy

Mentoring and training to support your personal and professional development

Hands-on projects with real impact in an international environment

Application Process

Please upload all application documents (a short cover letter, current CV/resume, and transcript of records) either as one combined file or as separate files in the Resume/CV section of the application form. Unfortunately, additional documents cannot be uploaded after submission.

Our hiring process is simple and transparent:

1. Review of your application

2. Brief introductory phone call with our University Talent Acquisition Team

3. One-hour video interview with the Hiring Team

We value diversity and are committed to creating an inclusive workplace. We welcome applications from all qualified individuals, regardless of ethnic, national, or social background, gender, disability, age, or sexual identity.

Germany Pay Range:

Freiburg 39Std: €2.476,89 EUR Monthly

If you’d like to learn more about the compensation associated with this opportunity, your recruiter will be happy to walk you through the details as you progress through the hiring process.

Notes for ECS 1100 students

Course spreadsheet notes

Skills mentioned: Test planning and documentation. Measurement analysis. MATLAB/Python/C/C++. CAD/Creo ideal.

Systems Engineering

Related system verification/testing work. Systems Engineering degree not explicitly listed.

Degree: Pursuing bachelor’s or master’s degree

Experience / eligibility: Bachelor's or master's student. Initial MATLAB, Python, C/C++ or similar experience.

Other: German B1 and English B2. Work authorization not specified in posting.

Other majors named: Medical/Biomedical Engineering, ME, Mechatronics, IT, EE, related technical

Career stage: Student internship / Internship, 6 months, March or April 2027

Salary evidence: Freiburg 39Std: €2.476,89 EUR Monthly
